

Viben offers free shipping for its Bluetooth Portable Speaker on Amazon and eBay

November 17, 2014

November 17, 2014 -

WILMINGTON, Del. ? With the holiday season around the corner, Viben is offering free shipping on its Viben-101 Bluetooth Portable Speaker available through Amazon and eBay. Customers in either marketplace will enjoy the savings.

While Prime Amazon members already receive free shipping on Amazon, purchases totaling more than \$35 now also qualify for free shipping. Since the Viben-101 is priced above \$35, purchasers will receive free shipping automatically, anywhere in the United States.

Similarly, free shipping on eBay is included with any Viben Bluetooth portable speaker purchase within the U.S.

As the newest contender in the portable audio accessories market, Viben has received nothing but positive reviews from its Bluetooth portable speaker since its recent release. One of the reasons for this is the unprecedented guarantee that comes with it. The Viben-101 is the only Bluetooth portable speaker on the market backed by a lifetime, no hassle, free replacement guarantee.

The mini speaker system comes in premium packaging, making it an impressive gift choice for holidays or birthdays, and instantly connects wirelessly to mobile devices, including iPhones, iPads and tablets.

The built-in speakerphone allows users to take a break from music to talk on the phone while doing other tasks, like cooking or working on the computer. In addition, Apple iPhone users with SIRI have the added benefit of using the microphone function on the speaker to activate hands-free conversation.

Despite its petite 3.5 inch by 2.5 inch size, a 5-watt loudspeaker output makes the Viben-101 capable of achieving loud volumes.

?I've introduced this speaker to dozens of people that like to listen to music and have enjoyed watching their

surprise and excitement in how a sound so big can come out of something so small,? said Viben Owner Chris Darling. ?I watch the smile come across their face when they realize they no longer have to subject themselves to the tinny sound emitted from the standard speakers inside of their iPads, tablets, iPhones, laptops or other mobile phones.?

Other features of the mini speaker system include a 40mm driver to help deliver massive and rich sound, a large speaker cavity, an LF diaphragm for outstanding bass, a built-in rechargeable battery, 6 control buttons for adjusting tracks, volume and phone wirelessly, a Micro USB charging port and additional audio line-in jack for optional wired speaker usage. In addition, the speaker is built using a soft housing and metal speaker mesh.

About Viben

Viben was founded by music lover Chris Darling as a company dedicated to creating a high quality experience for everyone who loves listening to music. The Bluetooth Portable Speaker is Viben?s first product, soon to be followed up by its wireless headphone, currently in production.
