October 01, 2021 -
Oklahoma City, Oklahoma based Green Sunshine Medical Weed Dispensary is reaching out to the wider community to share the varieties of cannabis they have on offer for people who have medical cards. With a variety of high quality cannabis available, they are dedicated to ensuring that those who need medicinal weed in Oklahoma City or the surrounding areas have a reliable supplier.

Martin Valkov, a representative for Green Sunshine Medical Weed Dispensary, says, ?Medicinal cannabis is a great step forward in treating many conditions, and those who are prescribed medicinal cannabis need to have somewhere where they can find high quality weed that can help in their treatment. Green Sunshine Medical Weed Dispensary was established with the intention of providing top shelf medical cannabis to the residents of Oklahoma City and the surrounding areas. Situated in the heart of Bricktown, we take a lot of pride in providing medical marijuana to all of our customers!?

As Volkov points out, medicinal cannabis is a proven and effective way to treat a variety of conditions. In the United States, the most common use for medical marijuana is for pain control. Though it cannot suppress severe pain (such as broken bones or post-surgical trauma), marijuana has proven to be very effective as a way to treat chronic pain and similar conditions. Medical marijuana is also clearly safe, especially compared to opiates, as it does not have similar addictive properties and is impossible to overdose on. It can also serve as an alternative for NSAIDs in cases where people cannot take them due to issues they may have with other conditions.

It has been proven that medicinal use of weed can ease the pain of multiple sclerosis and other kinds of nerve pain. Seeing as how this is an area where very few other options exist (and those that do are highly sedative), medical marijuana is an effective treatment for more reasons than it?s pain control capacities; patients claim that marijuana allows them to resume their previous activities without disorienting side effects. More can be found at

Marijuana is also said to be a fantastic muscle relaxant. In patients who are suffering from Parkinson?s disease, it has shown itself to be effective in lessening tremors. Further, it has also been used very successfully in treating pain associated with conditions such as fibromyalgia, endometriosis, interstitial cystitis and others where chronic pain is a problem.

The benefits of medical marijuana do not end there. It is used to manage nausea and weight loss and be used to treat glaucoma. There is currently research being conducted into its use and effectiveness in helping veterans who are returning from combat zones deal with PTSD; the research is proving quite informative, as many veterans and their therapists report drastic improvement and clamor for more studies ? and for a loosening of governmental restrictions on its study. Medical marijuana is also reported to help patients suffering from pain and wasting syndrome associated with HIV, in addition to irritable bowel syndrome and Crohn?s disease.

Green Sunshine Medical Weed Dispensary recognizes the importance of high quality weed in the treatment plans for many patients who are dealing with such issues, and how invaluable it can be to have access to good weed. All the products they offer, such as Blueberry Ghost, Crown Loyal, Bubba Kush and more, are carefully cultivated to ensure the best results for patients who use medical marjuana.

Valkov says, ?Medicinal use of weed can change lives. We know that, and we are doing our best to ensure that we can help our community benefit from it. If you need medicinal weed, even if you are unsure about exactly what strain or product will help you the most, come visit us at Green Sunshine Medical Weed Dispensary. We will help you figure everything out.?
