

Water Damage Restoration Services Now Available For Atlanta Residents

September 27, 2021

September 27, 2021 -

Conyers, Georgia based The Homestar Group is pleased to announce that they are providing water damage restoration services to the residents of the Atlanta community and the surrounding areas. The Homestar Group is committed to providing high quality and affordable renovations for every home project.

Flood damage in a home or business can be devastating and extremely costly. Restoring a flooded basement alone can cost families thousands of dollars, depending on the size of the affected area. If the entire house has been flooded, the National Flood Insurance Program (NFIP) estimates that flood damage repair can cost around \$7,800 for every 1-4 inches of water. For 9-12 inches of water, this extends to \$18,930. For 18 inches, the repair can cost as much as \$26,285.

Jeremy York of The Homestar Group says, "It is no understatement to say that water damage can be exorbitantly expensive to rectify, which is why the first 24 hours after your home has been flooded is the most crucial period if you want to prevent your property from getting damaged further, at which point you will likely

require an even larger financial investment for repairs. The Homestar Group is here to ensure that you get the right help you need to both prevent further damage and help you deal with the damage that has already been caused.?

The services provided by The Homestar Group include dealing with backed up sewage, flood and storm damage, overflowing toilets and damaged plumbing and water heater overflows. They also deal with any flood damage that may have occurred as a result of fire fighting efforts. The Homestar Group assures that they also provide 24-hour emergency services, ensuring that no Atlanta homeowner has to worry about not being able to get help at an inconvenient hour.

In the event of a flood, the company explains that there are two important actions to take. The first is to make sure that everyone is safe. If this means leaving the property, then it is important to wait until it is safe before returning home. When in the house, residents need to watch out for structural damage, such as warping or cracks in the foundation. The Homestar Group also recommends turning off electricity at the main breaker ? and wearing protective clothing and working with a professional when doing any cleanup.

Next, they need to document the damage. Before moving, changing or repairing anything, taking photos and videos of the damaged home is critical, more so if an insurance claim is to be filed. Making repairs before documenting the extent of damage can potentially decrease the extent of the insurance coverage.

The services provided by The Homestar Group have endeared the company to the local community, as is made evident by their reviews. On their Google profile alone, the Atlanta water damage restoration provider has an excellent rating of 4.7 out of 5 Stars from 60 reviews. Ashley Dove writes, ?My experience with Homestar was exceptional. From starting right after my home caught fire to finishing with the delivery of my items three months later once we closed on our house, they were professional. Brittney Daniel went above and far beyond to ensure my family received the best help and took care of our property. 100% will use them again should something ever happen!?

In another review, Maria Rollins writes, ?Brittany Daniels and her team came out at the request of Mike Wetzel (awesome mitigation VP). After the initial water damage property assessment, Brittany arrived on site the same day with dehumidifiers! After insurance approval, Brittany initiated her team within 72 hours to begin removal of damaged property! The team came in, removed damaged property, treated areas and continued dehumidifying. Homestar has been a true blessing for our family! They have made our stressful situation less stressful! Extremely professional and timely! Would give 10 stars if the option was available!?
