The 10 yard dumpster measures 8 feet by 10 feet by 4 feet and has a capacity equivalent to four times that of a pickup truck load. It is usually appropriate for small-scale projects, such as: small home renovation projects; room decluttering and clean out projects; outdoor yard cleaning projects; and small home remodeling projects, such as remodeling a half bathroom, installation of new kitchen countertops, removal of living room flooring, and removing a wall. Outdoor projects include trimming of shrubs and trees, removal of a brick patio, repair of a section of the driveway, and general landscaping.

The 15 yard dumpster measures 8 feet by 10 feet by 5 feet and can contain an equivalent of six times that of a pickup truck load. It can be used for relatively small projects, including: removal of waste and junk from the yard waste; repair of a sidewalk or driveway; the cleaning out of a large room, such as a garage, bedroom, basement, or attic; and various home renovation projects, including the installation of kitchen cabinets, removal of flooring, walls, and carpet, and remodeling of a laundry room. It can also be used to contain waste and debris from outdoor projects, such as breaking up a paver patio, removal of old shingles, and clearing of debris from a yard cleanup.

The residential roll off dumpster sizes they offer can accommodate a broad range of home renovation projects, such as: house clean outs, roof replacements, deck removal, yard waste disposal, shed removal, and also junk removal jobs. They also provide commercial and construction dumpster rentals. It is important to note that company representatives are ready to help customers in choosing the proper size of roll off dumpster for their specific project.
