

# Caperton Fertility Institute Celebrates Five Years Of Family-Focused Care

*October 01, 2021*

October 01, 2021 -
Albuquerque, NM based Caperton Fertility Institute (CFI) recently celebrated their 5th Anniversary on July 1, 2021. Led by Drs. Lee and Kelly Caperton, the clinic?s staff and team spent their anniversary looking back on the patients they helped reach a new stage in their lives. They also reaffirmed their dedication to helping everyone in their community achieve their goal of creating a new family in the best possible environment.

?Kelly and I feel incredibly fortunate to be considered one of the elite fertility practices in the United States, helping thousands of people achieve their dream of starting and growing families," stated Dr. Lee Caperton, Co-Founder, CEO and Medical Director of Caperton Fertility Institute. "It's our focus on providing compassionate patient care, commitment to excellence in laboratory technology and passion for family that drives our ability to assist so many deserving families. We're proud of the last five years and look forward to getting to do this for many more.?

Patients looking for fertility treatments in New Mexico need look no further than Caperton Fertility Institute,

and this is heavily due to the immense expertise and experience represented by its founders. Dr. Lee Caperton, for instance, is the sole Board Certified Reproductive Endocrinologist and Fertility Specialist practicing and living in the state. He focuses on driving the field forward at every turn, and he has already pioneered advancements in numerous areas, such as the genetic screening of embryos (PGS/PGD), single embryo transfer (SET) and laser-assisted reproductive techniques (assisted hatching, CGH).

Dr. Kelly Caperton, Co-Founder and President of Caperton Fertility Institute adds, ?When Lee and I founded this business, it was with one core value in mind: family. We create that environment for our patients, their loved ones and our team members, and we lead with compassion, resilience and hope. It's an honor to do what we do, and we're thrilled to be celebrating this milestone. For anyone who might be struggling with fertility, we invite you to connect with us. We'll come up with a treatment plan that's right for you!"

Patients will find that this confidence is not misplaced in the slightest. Her experience spans a staggering 20 years in general obstetrics and gynecology, both in her own practice and as part of a large group practice. Dr. Caperton is also Board Certified by the American Board of Obstetrics and Gynecology and is a Fellow of the American College of OBGYN. Today, she focuses on maintaining the exacting standards of the clinic?s day-to-day operations and procedures, supporting her team of like-minded professionals wherever necessary. Her prior experience with people of all walks of life helps her connect with every new patient she sees, allowing her to understand their goals on the fundamental level. In turn, this lets patients find comfort in the process as they get ready to start a new family.

Both doctors believe strongly in staying in touch with their community and following up with their patients to ensure that their plans are proceeding as intended. In addition to giving patients the peace of mind they need upon being checked on by a professional, the duo consider this an excellent way of re-examining their own methodologies in order to discover how they may improve the service they offer for future (and perhaps even returning) patients. Those who wish to undergo treatments for the first time at this clinic, however, may use feedback from former patients to gain some insight on the overall quality of the service provided.

?We are so thankful to Caperton Fertility,? says one 5-Star Google review from Brittney A. ?After three years of struggling to conceive and failed attempts with other doctors, they were able to finally treat my condition. After just one IVF cycle, I am now pregnant with my baby boy. The staff, especially Dr. Rachel and nurse Courtney, answered every question and made me feel so comfortable. I couldn't be more thankful to the whole clinic for making my dreams come true. I highly recommend them.?

Drs. Lee and Kelly Caperton opened Caperton Fertility Institute in 2016. Reaching this milestone has notably not given them or their team any reason to pause their efforts. Having celebrated their anniversary, the clinic

and its staff are more than ready to continue their work. They encourage people from across the region and beyond to get in touch today if they wish to have a personalized consultation. Further details can be found on their official website.
