Hard Drive Recovery Group Republishes Website After Complete Redesign

October 04, 2021

October 04, 2021 -

Hard Drive Recovery Group, a data recovery service company in Irvine, CA, has announced that they have completely redesigned and republished their website. The purpose of the website redesign was to make it easier for site visitors to find what they are looking for and to make the site mobile responsive. Thus, they have simplified the website design, allowing site visitors to get a glimpse of a summary of the services they provide on the first page. Navigation is also made easy as there are only a few sections to go to, such as data recovery services, about the company, and free evaluation.

Site visitors can click on the Data Recovery Services tab and choose one of their specific services. These include: hard drive recovery; laptop data recovery; Mac data recovery; RAID data recovery; Seagate data recovery; and digital image recovery. RAID data recovery is further subdivided into: fast RAID server recovery; Linux data recovery; and Exchange data recovery.

Hard drive recovery services are those who have lost valuable data on their computer because of hard drive failure. Damage to a hard drive will usually mean the loss of important data, such as business documents, email, tax files, family photos and more. Because hard drives are mechanical devices, they are subject to

physical damage and may fail. When this happens, the Windows blue screen of death appears and the user is left wondering how to retrieve those valuable data. Even with the advances in technology, allowing hard drives to be smaller and to store more data, they have in fact become more sensitive and more at risk of failure. Fortunately, Hard Drive Recovery Group offers free hard drive diagnosis and a free data recovery quote. And they also offer a ?no data recovered, no charge? guarantee.

Meanwhile, laptop users tend to use their computers for more applications compared to desktop computer users because they are able to bring the laptop anywhere. That is why when a laptop computer has a hard drive breakdown or failure, the impact for the user can really be overwhelming. Fortunately, the Hard Drive Recovery Group has a team of laptop data recovery experts that are capable of providing secure and quick data recovery at affordable prices.

Hard Drive Recovery Group has also been providing data recovery services for Apple computer devices, such as the Mac, iPhone, iPad, and other new products. Despite the high quality of Apple devices, hard drive failures may still occur. And this is exacerbated by the fact that a Mac hard drive recovery can be more complex when compared to Windows hard drive recovery. Nevertheless, they have a team of Mac data recovery specialists who are knowledgeable and experienced regarding the Mac OS system.

Meanwhile, many companies use RAID hard drive configurations because these offer redundancy for mission critical applications, such as Oracle database servers or Microsoft Exchange servers. RAID array systems are designed to provide superb performance and much better data speed and availability. However, RAID system failure is still possible and the team at Hard Drive Recovery Group has the necessary experience in RAID data recovery.

Established in 1987, Hard Drive Recovery Group is a national company that data recovery for hard drives and other media. They have accumulated a lot of experience in working with different kinds of people and companies, including Fortune 500 companies and large non-profit organizations, and in the process, they have recovered thousands of terabytes of data. Those who are looking for data recovery services in Santa Ana, Irvine, Anaheim, Orange, Newport Beach, or other Orange County locations can benefit from their services. They also provide free business hard drive pickup, and for RAID issues in Los Angeles, they also provide free data recovery pickup. Their goal is to provide safe data recovery while offering affordable flat rate pricing and excellent customer service.

Those who are interested in learning more about the data recovery services provided by the Hard Drive Recovery Group can visit their website, or contact them through the telephone or via email. They are open from Monday to Friday, from 8:00 am to 6:00 pm.
