

Tree Service Experts Sacramento Helps Homeowner Transplant Mature Tree to Create Space for New Swimming Pool

September 30, 2021

September 30, 2021 -
Sacramento, California ? When Jimmy decided to build an in-ground swimming pool on his property, the only space he could use was occupied by a large white pine. He did not want to cut down the tree as it served as a heritage plant for his family and the entire neighborhood. Luckily, when he contacted Tree Service Experts Sacramento, the company told him that they could carefully transplant the tree to a new location.

?I was intrigued when the company told me that they could move live trees from one place to the other,? said Jimmy, ?We talked about the payments ? which were very reasonable considering the work involved ? and we agreed that they come today. When they arrived, they studied the tree and did their estimates to determine how deep the roots went. They then dug a hole where they would put the tree. They used their machines to uproot the tree and then carried it to the new location. Their work was so clean and effective that the tree still looks healthy 8 hours after transplanting.?

Speaking after the project, Tree Service Experts Sacramento chief of field operations had the following to say, ?Our goal is to safeguard this city?s urban forest. For this reason, we do everything in our power to avoid killing trees. Transplanting is always a good option, especially when homeowners have a new area they would like to place their tree. Our team of professionals uses its experience to safely transplant the tree and ensure its survival.?

Tree Service Experts Sacramento has been offering tree services in Sacramento for more than 25 years. The company specializes in tree trimming, tree pruning, tree removal, stump removals, and emergency tree service Sacramento.

The company notes that its tree trimming team Sacramento helps homeowners restore the aesthetic appeal of trees while the tree pruning team ensures tree crowns are safe and healthy.
