Coast Sydney Botanicals Explains Why Australian Natural Perfume Oil is Preferred over Synthetic Fragrance Products

October 06, 2021

October 06, 2021 -
The Coast Sydney Botanicals perfume company wants to stress why it is important to choose natural perfume oil in Australia over synthetic fragrances. That is because synthetic fragrance products usually contain ingredients that may be harmful to a person?s health. Perfume companies may include any ingredients that they want to put in the product under the label of ?fragrance? but there are two ingredients that are often found in cosmetics, sunscreen, and skincare that are particularly troublesome.

Methylparaben and alkylphenol have been shown in various studies to act as irritants that can trigger allergies, dermatitis, and respiratory problems. They can also act as endocrine disruptors that prevent hormones from doing what they are supposed to do. Other typical symptoms that have been connected to synthetic fragrance include headaches, sores eyes, migraines, irritated noses and throats, nausea and dizziness. Phthalates are also a group of chemicals that are included in scented products to make sure that the fragrance will last longer on the skin. However, phthalates have been found to be linked to asthma, breast cancer, obesity, attention-deficit hyperactivity disorder, and type II diabetes.

On the other hand, Coast Sydney Botanicals offers a range of natural handcrafted perfumes made by blending certain essential oils that deliver the desired scents without using any synthetic ingredients. Some of the natural essential oils they use are: Frankincense, Rose Damask, Bergamot, Champaka (White Magnolia), Jasmine, and Ylang Ylang.

Their three main perfume oils are: JOY Natural Perfume Oil, LOVE Natural Perfume Oil, and LOVE Natural Perfume Oil. JOY Natural Perfume Oil gets its natural scent from Gardenia with fruity notes of Cassis blackcurrant. It is then perfectly blended with lime for a citrus scene on a base of sandalwood, orris root, and vanilla. Its style is exotic, floral and playful. The top notes for this perfume are orange sweet and lime; the mid

notes are gardenia, neroli, and cassis; and the base notes are sandalwood, vanilla, and orris root. It is made with fractionated coconut oil and organic jojoba oil with precious absolute oils and pure essential oils.

LOVE Natural Perfume Oil is naturally scented by Jasmine Sambac absolute, which has one of the most beautiful floral aroma available in the whole world. It is perfectly blended with geranium, clove and earthy vetiver on a base of sandalwood, cedarwood, vanilla, and ambrette. Its style is luxurious, romantic and sensual. Its top notes are geranium, orange sweet and jasmine. Its mid notes are vetiver, clove and patchouli. Base notes are vanilla, cedarwood, sandalwood, and ambrette. It is made with organic jojoba oil, pure essential oils, fractionated coconut oil, and precious absolute oils.

HOPE Natural Perfume Oil is naturally scented by jasmine, linden blossom and sambac with floral notes of pink grapefruit, lime and coconut, perfectly blended on a base of benzoin, orris root, and clove. Its style is exotic, fruity and charming. Its top notes are pink grapefruit, lime and coconut. Its mid notes are jasmine, linden blossom, and tuberose. Its base notes are clove, orris root, patchouli, and benzoin. It is made with fractionated coconut oil, precious absolute oils, pure essential oils, and organic jojoba oil.

Meanwhile, those who have tried the natural perfume products from Coast Sydney Botanicals have provided highly positive reviews. For instance, Robyn gave the Tangerine Love Face Cleasing Oil five stars and said, ?This is the favourite part of my skincare routine, because it smells beautiful. It feels nice on my skin. Very effective for removing sunscreen and make-up. I leave it on my face while showering, especially to protect my skin from the drying effect of shampoo. I tried the travel size then bought this soon after. Thank you for the cute little samples also.?

Founded in 2016, Coast Sydney Botanicals is committed to using pure oils and pure botanicals. Various factors make their products stand out among the crowd. First of all, their products are 100 percent made from plants. Second, they are powerful and effective because they are nutrient dense. Third, they don?t contain any artificial fragrance nor any toxins. Fourth, they don?t contain parabens. And lastly, their products are cruelty-free because they don?t use animal testing.
