

## **San Diego Electrician Offers Company Advice & Personal Service To Community**

*October 12, 2021*

October 12, 2021 - PRESSADVANTAGE -

San Diego, CA based Green Electric Solutions is pleased to offer their expertise in electrical systems to local residents and businesses. The El Cajon electric service makes it a point to reduce customer stress wherever possible and finish jobs in a prompt manner. Customers are welcome to call the company's office today to request a free estimate for any electrical job they may need handled by a professional.

Since the company works with residential and commercial customers, they understand that emergencies can occur at any time of day. To ensure no customer has to wait for long hours to receive help, the company ensures their team is available around the clock (and throughout the week). This means a customer can expect someone to take their call virtually the moment it is placed.

"Electrical problems can have fatal consequences if not addressed," says Steve Toner of Green Electric Solutions. "You don't want to take any chances with your property's electric systems, so we urge you to call us as soon as you notice anything amiss. Sparks are a classic sign of danger, but some dangers can present no visual warnings whatsoever. If your power suddenly goes out for no apparent reasons, such as a full neighborhood outage, we urge you to avoid handling any appliances or conductive services. Just call us, and

we will be with you as soon as possible. Safety is always our primary concern.?

The company's emphasis on safety is apparent in the services they offer as well. For instance, while many will not be surprised to learn the company offers free estimates, they should also be aware that Green Electric is proud to carry out free home safety inspections. Similarly, homeowners are encouraged to call immediately if they suspect an electrical fault since the company also provides advice over the phone for free. This is an easy way for members of the community to seek a professional's insight instead of endangering themselves by investigating a problem alone. All they have to do is describe the issue and follow the instructions provided, and the company will help them determine whether they are at risk (the customer can decide if they want a team dispatched to assist at any point during this call).

Toner adds, "Your safety is our priority at all times, so we advise you to take advantage of our free services to achieve this. In the event you need more specialized assistance, we will provide a written guarantee of the work we will do and answer any concerns you may have. Our technicians are fully insured as well, so you have nothing to worry about." Further details can be found on the official Green Electric Solutions company website.

Hannah F. shares in their top-rated Google review, "Joe worked on several electrical issues in my 1930s home and worked tirelessly to replace old wires, install a new circuit box with breaker switches, and replace old two-prong outlets inside. His contact with SDG&E was professional and timely, and it helped make the repairs less stressful to me. He was thorough in checking his work and returned to fix some funky wiring later on. I highly recommend this business!?"

While customer reviews are a good way to estimate the value of a company's services, comments shared by other professionals in similar industries may offer even more insight. Green Electric often partners with other businesses, much to their satisfaction. As one review from Freddy F. attests, "I am a plumbing contractor and needed a certified electrician for additional work on a job site. Great group, will now refer all electrical work to them. They were on time and the technician knew his trade. Very impressed. They were able to finance my client for their work. A first class operation.?"

Customers may find more reviews on the company's online profile, which also provides their location, contact details and more. Alternatively, they may contact Steve Toner of Green Electric Solutions directly if they need to follow up on any further inquiries. The locally owned-and-operated company is always ready to help their community.
