

Patented Soccer Training System Released By StrikeZone Soccer

October 21, 2015

October 21, 2015 - PRESSADVANTAGE -

StrikeZone Soccer is proud to announce that they have released their patented soccer training system. It is a complete technical system designed for coaching and training soccer players. The system comes with a free kick specialist soccer ball, a visual training aid shoe sleeve, and an instructional DVD. This soccer training system is already proving to be very popular.

"Soccer has become such a popular sport that more and more people want to learn about it," says Paul Gallagher from StrikeZone Soccer. "Our system is perfect for team coaches, but it is equally good for parents and young people who simply want to learn more about the game. The system contains everything you could possibly need to get started."

The instructional system comes with five colored strike zones. This has been designed to show players where they should kick the ball, thereby allowing them to practice the different kicking techniques. These include such techniques as 'driven ball', 'push pass', 'crossing' and 'chipping'. The colored arrows clearly show which way players should follow so that they can have the best accuracy and power.

The visual training aid sleeve also has the five colors printed on it. Players can use this to identify the different zones needed for best performance. It includes 'pass', 'control', 'shoot' and 'dribble'. Hence, the system teaches players all the ins and outs of the game and it provides a way for coaches to give clear instructions on what they want their players to achieve.

"We also wanted to make sure that our system was inclusive for players of all ages," adds Paul Gallagher. "This is why those who buy the system can choose different sizes for the sleeve. We have three options available - small, medium and large - so that players with all shoe sizes can learn how to play the game properly."

The company also encourages everyone to visit their website at <http://www.strikezonesoccer.com/>. Further information on the patented system and the philosophy behind it is included there. Details about soccer camps, further instructional videos and listings of StrikeZone products are also provided on the website.
