They have been in the business for over 30 years, providing convenient and quality care to patients of all ages in Beverly Hills.

Jochen Chiropractic & Wellness Center asserts that chiropractic care is the most effective way to treat pain and discomfort in the back, neck, shoulders, arms, or legs brought about by injury. It is safe and non-invasive, allowing them to treat patients of all ages, including pregnant women, seniors and children.

The Center also utilizes the latest technology in the industry to provide superior chiropractic care. They are proud of their state-of-the art facilities and equipment, which include high-resolution X-ray machines, the latest computerized orthopaedic spinal evaluation software and other chiropractic tools. All of these tools and systems are used to ensure that they can help patients achieve better health without having to resort to drugs or surgery. The state-of-the-art facility offered by Jochen Chiropractic & Wellness Center is just one of the many reasons why they are one of the leading chiropractic centers in Beverly Hills, CA.

In addition to quality chiropractic care, Jochen Chiropractic & Wellness Center also offers acupuncture therapy, cupping and other TCM procedures. Their goal is to help patients achieve a pain-free, drug-free state while enhancing their overall health and wellness. TCM has long been recognized as an effective method of treatment and has been widely used by many patients all over the world for centuries. It is a form of alternative medicine that uses natural remedies to treat and prevent illnesses. TCM is based on the belief that qi (energy) and blood flow must be balanced, smooth and flowing for a person to stay healthy. If this balance is disrupted or weakened by injury or other causes like stress, fatigue or poor diet then it will result in pain and disease.

Jochen Chiropractic & Wellness Center also provides skin care and aesthetic services to their patients. This includes microcurrent treatments, microdermabrasion, signature facial treatments and body hair treatments. They also offer laser treatments for those who need post-surgical rehabilitation, wound healing, healing strains of the muscles, tendons, ligaments and more.
