

PSS International Removals Increases Removals Facilities In London

October 22, 2021

London, England - October 22, 2021 - PRESSADVANTAGE -

PSS International Removals, based in London, UK, would like to announce that they have increased facilities for international removals in London. The company has made this improvement in order to cope with increased demand. At present, the demand for the international removals company in London has increased significantly recently due to a number of reasons.

A predominant reason for the need to increase facilities is the large number of expats moving back to their home country due to Brexit and the Covid-19 pandemic. These expats include many EU nationals who are leaving the UK, but also a large number of American, Australian and New Zealand citizens who have made the decision to return to their home countries.

Liam Witham, CEO of PSS International Removals, acknowledges this increased demand, stating, "The demand for moving to Europe and further overseas has increased significantly as Covid-19 restrictions begin to relax, so this investment is very timely. Although the international removals and shipping industry is facing unprecedented challenges, we are committed to offering our customers the best possible service." There has also been a significant amount of pent-up demand which has been released due to the relaxation of

lockdowns and travel restriction measures that were put in place during the pandemic. A fair number of British citizens are also choosing to start a new life in Europe or further away.

PSS International Removals is conveniently located in order to service customers in the Greater London region. The company has a sales office in Ealing, near central London, a head office and main warehouse in Croydon, South London and a large customs bonded warehouse in Dartford, Kent Kent which enables easy access to South East London as well as access to Europe via Dover ferry service and the channel tunnel.

PSS also have a new warehouse in Rainham, Essex, just off the A13 which complements their current setup by having easier access to central London and the London Gateway port. The London office is able to coordinate and provide facilities across the UK. In the case of large full household removals, the company has removals crews who will pack at customers' homes and load all their possessions onto shipping containers to be taken directly to the port. In the case of smaller moves, household contents can be packed and taken to a warehouse in Croydon or Dartford for loading onto a shared shipping container. Witham states, "As one of the largest international removals companies in the UK, we have been serving customers in London and South East England for nearly 40 years. Our expanded facilities and new vehicles allow us to offer an even higher standard of service."

The company also offers box and baggage shipping services. The company has a fleet of removals vans operating within the M25 area which will deliver cartons and packing materials. The fleet handles the collection of packed boxes and bags on a daily basis. For both the international removals service and baggage shipping service, services are provided door-to-door. PSS International Removals is able to handle collections from anywhere in London and within the UK with shipping and delivery offered to most countries worldwide. The service range of shipping and delivery includes all of Europe and popular overseas destinations, such as the USA, Canada, Australia and New Zealand.

PSS International Removals is one of the UK's leading specialist Personal Shipping Services. The company specializes in international removals and shipping only for personal effects, which has given the company the ability to provide a high level of service and expertise for expats and families moving overseas. All staff and packers are specifically trained in international removals and shipping, with many having lived abroad at some time in their lives, giving them first-hand experience of the pressures of moving overseas.

PSS International Removals is also accredited by the British Association of Removers (BAR), which is dedicated to promoting professional excellence in the UK removals industry. A member company must meet

the high standards included in the BAR Code of Practice, so only the best removal providers are able to meet these standards. The company is also a member of the BAR Overseas Group, an accreditation to the higher standards required for international moves. The company takes pride in the high standard of service they provide and have dedicated themselves to ensuring that their customers experience a stress-free moving process.

To learn more about the services offered by PSS International Removals, customers and other interested parties may visit the company's official website. Their representatives may also be contacted for inquiries via phone and email.
