

Business Basics Launches Home Security Stickers

October 30, 2015

October 30, 2015 - PRESSADVANTAGE -

Business Basics, which is based in Federal Heights, CO, is proud to have launched their new home security stickers. These stickers have been designed to help prevent crimes including robbery and trespassing. With a clear message of a security system providing around the clock protection, the stickers serve as a deterrent to criminals who might be planning something against that particular home.

"Crimes such as burglary and trespassing are crimes of opportunity," says Carlos Salguero from Business Basics. "Taking away that opportunity, by telling people that security is in place, is often all that is needed to prevent crime. Even if no real security is available, the stickers are often enough to keep people away."

Business Basics is committed to help reduce crimes. Their stickers, which are brightly colored and 4 by 3 inches in size, are designed to make an intruder or burglar rethink their targeted property. By making them aware that a security system is in place - even if it isn't - they will often discontinue what they have been planning. Having these stickers in place is a great way to increase peace of mind as well. Few things are as frightening as being burgled when having children or other loved ones in a home.

The stickers also have the potential to help people save money. While most people are insured, they will have to pay much more if their property is burgled. The insurance premiums will increase after a burglary. As

the stickers act as a strong deterrent, there is no need to make a claim on an insurance policy or to increase premiums.

"Preventing burglary is something that everybody should be committed to," adds Carlos Salguero. "After all, a man's home is his castle. However, full security systems are often incredibly expensive and not everybody has the means to be able to afford them. Our stickers are affordable and effective, which means people are able to keep their properties safer without having to break the bank."

The home security signs come in a pack of six. They are clearly visible, warning people that a security system is in place. A picture of a home and lock is included, making it clear that a property is secured.
