

EPS Landscaping & Tree Service Receives 5-Star Feedback From Southwest Ranches Customer

October 25, 2021

Pembroke Pines, Florida - October 25, 2021 - PRESSADVANTAGE -

EPS Landscaping & Tree Service LLC offers many yard beautification services to those in Pembroke Pines, FL and many other Broward County areas. One of the areas where their reputable landscaping and tree work is adding new customers regularly is Southwest Ranches, Florida. The company is proud to help home and business owners in this beautiful Broward County area that's nestled between Pembroke Pines and Weston keep their landscapes in pristine condition. They do this by offering those located there a wide variety of landscape and tree services. These tasks are specifically aimed at keeping the residential and commercial properties in that area looking great and their associated trees and other plant life in the healthiest possible condition.

Greg O'Connell, who co-owns EPS Landscaping & Tree along with his wife, says, "Our crews love going into the Southwest Ranches community to work because our customers there are so friendly and pleasant to work with. Although some of this is due to the natural disposition of the fine folks living in the area, we like to think that a part of the way that they treat us stems from the skill and dedication that we bring to every landscaping and tree task that we do for them. We will continue to do whatever it takes to offer our customers in Southwest Ranches and the other areas that we serve a very satisfying experience when they

call upon us for landscaping and tree assistance.?

The company co-owner went on to talk about some of the services that they offer to those in Southwest Ranches. This includes their many different lawn services such as grass cutting, edging, lawn trimming, and fertilization. Their arborist-led tree crews are also very proficient at tree removal, stump grinding, tree trimming, tree pruning, tree relocation, and tree planting. He also pointed out that many of their essential lawn and tree maintenance services can be bundled together for their Southwest Ranches customers at a nice savings. O'Connell also brought up the fact that many in this area are now taking advantage of the landscape design services that they offer too. This includes regular landscaping design services and more unique-looking tropical and poolscape design services. They also specialize in building retaining walls, installing sod, and doing all sorts of hardscapes. The company co-owner also reminded that customers in the Southwest Ranches area should not overlook the importance of having an irrigation system installed on their property. This will help lessen the impact that the hot Southeastern Florida season has on yards in that area. He went on to mention that part of the reason that they offer so many different services to their customers in the Southwest Ranches area is that the large variety of landscaping situations there demands it. Some yards in the area are full of trees that need to be trimmed and maintained while others are mainly made up of grasses and plant beds or have swimming pools in their backyards which require a completely different set of landscaping methods to keep them looking good.

This 5-star review from a Southwest Ranches, FL customer attests to the company's dedication to their craft whether they are doing a sizeable landscape installation project in the area or a simple yard beautification task. Jake Glaser stated, "EPS came by and did a "freshen up" of our landscaping. They were fast and efficient! The pictures that were sent prior are what really got us excited as I could see what the finished project was approximately going to look like!?"

O'Connell also talked about how all of their Southwest Ranches lawn care, tree, and irrigation services are fully guaranteed. Those that are interested in learning more about the yard beautification services that EPS Landscaping & Tree Service offers in Southwest Ranches and many other surrounding Florida areas can get in touch with them by phone, email, or by filling out the form that's found on the company website.
