# ProVetria's Dog Probiotics Shown To Be Very Well-received By Dog Owners

*October 26, 2015*

October 26, 2015 -

ProVetria, a pet care business based in Deerfield Beach, FL, are proud to announce that their recently launched probiotic product for dogs has been very well received. The product, which can be seen on http://www.amazon.com/Probiotic-Formula-Nucleotides-Digestive-Support/dp/B00O28C8H4, has received many positive reviews, highlighting the various benefits it offers to dogs. The company has been very happy to hear this and will continue to offer their highly-rated service.

"We wanted to create a product with a difference," says Marcus Peterson from ProVetria. "Our probiotic product is far superior to others of its kind, because it also addresses existing stomach upsets such as diarrhea and gas. It has been very heartening to see that dog owners have positively reviewed our product, because that means we are making a meaningful difference to the overall health of dogs, our favorite animal."

As can be seen on provetria.com, the product contains nucleotides, which in combination with probiotics have various health benefits to a dog's digestive system. In fact, they have been shown to be beneficial in terms of controlling everything from loose stools to constipation and from inflammatory bowel disease to allergy symptoms. The combo of nucleotides, probiotics and prebiotics is designed specifically for the

gastrointestinal health of canine's. This is vital as 70% of their immune system is found in a dog's gastrointestinal tract.

The reviews have been overwhelmingly positive. "This stuff has made the biggest difference for my dog!" says Carter Reviews. "I have a 9 month old pit bull who has a lot of trouble with digestion. We have tried almost every dog food available from the basic ones to the super expensive ones and she has trouble periodically with all of them. I have been sprinkling a little scoop on her food every morning for close to a week now and not only does she love it but she has not gotten sick or had any digestion problems since we started using it."

The company also encourages all customers to follow them on Facebook through https://www.facebook.com/ProVetria, where they can share their own success stories. Additionally, the page will keep them up to date of any special offers, discounts or new research developments.
