

Electric Company in San Diego Now Offering 60-Minute & Emergency Service Calls

October 28, 2021

October 28, 2021 - PRESSADVANTAGE -

Green Electric Solutions is a company that has built a solid reputation for the electrical services that it offers in the San Diego, California area. This is not only attributed to the quality of the work the company's techs do but also because those at Green Electric Solutions have proven they truly care about their customers. Among the many different ways that they show this is by offering some of the fastest service response times of any electrical contractor in their part of Southern California. This includes doing same-day electric service in many cases and the company has even taken this one giant step further by offering 60-minute and 24/7 emergency service calls. Quickly resolving its customers' pressing electrical issues has been a hallmark of this contractor for over 20-years now.

A representative of the company, Steve Toner, says, "There are few things in life in this day and age that are harder for people to live without than the proper flow of electricity through their homes and business. And with our reputation for offering fast service response times, our customers in the San Diego area never have to go without power flowing correctly through their homes and buildings for very long. We have even greatly expanded the number of locations that we work out of, such as our newer El Cajon Office, to be able to consistently respond quickly to our customers' urgent electrical needs. Our company will continue to do

whatever it takes to get to our customers quickly after they request help from us.?

Toner went on to say that his company's 60-minute service has been a big hit with their customers. This service can be availed by contacting the company within normal business hours when a customer has an electrical issue that needs to be resolved urgently. They will then schedule a tech to get to that customer in an hour or less. He stated that they have enough talented electricians on the road in the San Diego area during the day to make this happen. The company representative mentioned that Green Electric Solutions also recognizes the fact that electrical problems don't just happen between 8 am to 6 pm Monday thru Friday. That's why they are pleased to offer 24-hour emergency service 365 days a year. He added that their customers can expect someone to pick up the phone no matter what time of the night or day that the call. This is something that remains true when someone calls the main office in San Diego or any satellite branch such as their El Cajon Location.

The company representative also talked about that whether a customer has an electrical-related emergency or just needs some routine work done, they can take advantage of the wide range of electrical services the company offers. This includes both residential and commercial electric troubleshooting and repairs. They also do new electrical installations and retrofit and upgrade work. He mentioned that the company also specializes in ceiling fan installation, electrical panel upgrades, and generator installations. Toner mentioned that their company is also fully licensed & insured, will provide a written guarantee for their work on request, and offers free estimates & home safety inspections.

Those home and business owners in the San Diego area that have taken advantage of Green Electric Solutions services have had nothing but good things to say about the company in reviews. Andria Smith proclaimed, "I called Green Electric Solutions at 11:00 pm on a Saturday because I had lost power to half of my house, and my father who was visiting was on oxygen. The technician Joe showed up within the hour and was able to restore power to the entire house within 30 minutes. I would recommend this company to anyone, and I've nicknamed them the "life saver". Stan Blake stated, "When the circuit blew for the computer room, I quickly grabbed the yellow pages and called this company because they were a member of the BBB and offered 60-minute service. The electrician was on time and got our computer circuit quickly repaired for under \$250.00. This company is awesome."

Those in San Diego and the surrounding areas that need electrical assistance can contact Green Electric Solutions by phone 24-hours a day and can find out more information on the company's services by referring to its website at <https://www.electrical-pros.com/>.
