

Emergency Dentist - Dental Clinic and Implant Centre Always Ready to Provide Treatment for Dental Emergencies in London

November 13, 2021

November 13, 2021 -
Emergency Dentist - Dental Clinic and Implant Centre wants to inform people in London and neighbouring areas that aside from being a full-service dental clinic they are always ready to provide treatment for dental emergencies. They have a team of out of hours dentists who offer near 24-hour emergency dental services in Holborn / Tottenham Court Road, Central London.

Greg Murray, a representative for Emergency Dentist, says, ?You should never experience dental pain, and we will do everything we can to relieve your pain, find the underlying cause, and treat it. We speak English, Hungarian (Magyar Fogorvos London), Italian (Dentista Italiano a Londra) and Polish (Polski Dentysta Londyn). We are open on the weekends, open on Saturdays and Sundays. We are open during the coronavirus (COVID-19) lockdown (only for real emergency cases).?

Their emergency dental team is made up of oral surgeons, general and cosmetic dentists, and orthodontists. Under the general dentistry category, they can provide emergency root canal treatment, which is for repairing and saving a tooth that is badly decayed or infected. A root canal is typically performed when the pulp is

damaged or the nerve of the tooth has been infected. During the procedure, the pulp and nerve are removed and the inside of the tooth is cleaned and then sealed.

Their emergency dentist in London can also perform dental extractions, including wisdom tooth extraction. A dental extraction is considered to be a surgical procedure and is required in certain cases, such as: infections, to relieve tooth crowding, pericoronitis, and supernumerary teeth. Wisdom teeth may also extracted due to a number of reasons. It can be extracted by a dentist or by a dental surgeon for more complicated cases.

People who have a dental emergency can call their emergency number, which will be answered by a multilingual customer service who get the preliminary details, such as name and phone number and then will inform the dentist who is on call that day. Next, they will inform the patient about the earliest appointment based on the patient?s convenience. Customer service will then provide the patient via text message or e-mail the location of the surgery, approach, and parking information. In the event that a member of staff is not available to answer the call, patients can leave their name and telephone number on the answering machine and they return the call as soon as possible.

For cosmetic dentistry, they can provide invisible (white) dental fillings, teeth whitening, dental veneers, dental crowns, dental bridges, teeth cleaning, and gingival bleaching and surgery. Tooth-coloured dental fillings, which are also called invisible fillings, are used to restore teeth. These offer a safe and more attractive alternative to amalgam dental fillings.

They can also provide dental implants, a root resection, gum grafting, bone grafting, dentures, overdentures, and all on four dentures. Dental implants can be used as tooth replacement. It is made of titanium alloy and it has threads on one end and this serves as an artificial tooth root. It is screwed into the jaw bone at a carefully chosen location and angle. An artificial tooth is then placed on the implant and this is both functional and aesthetic.

For orthodontics, they offer regular dental braces or Invisalign. Invisalign aligners are made of clear and safe plastic, which means they are hardly noticeable, and they are removable. These are custom-made to ensure that they exert an accurate and controlled force on the teeth that will gradually bring about tooth movement and alignment. Each set of upper and lower aligners is worn 14 days, after which it is replaced by a new set.

Emergency Dentist - Dental Clinic and Implant Centre is conveniently situated at 8F Gilbert Place, Bloomsbury (British Museum), London, WC1A 2JD. It is accessible from the London Tube stations of Holborn Station (Central line, Piccadilly line) and Tottenham Court Road Station (Central line, Northern Line).

Those who are interested in learning more about the services provided can check out their website, or contact them through the telephone or via email.
