

Milwaukee Tree Service Experts Works Overnight to Complete an Emergency Tree Removal Procedure

November 05, 2021

November 05, 2021 -

Milwaukee, Wisconsin ? Yesterday, 53 minutes after midnight, Milwaukee Tree Service Experts had to wake up its emergency tree service team to save a homeowner from imminent property damage. The team left the company's offices at around 1 am and arrived at the emergency site 30 minutes later. Working through the night to remove a broken white pine, the company helped Mr. Davidson avoid spending money on expensive property repairs.

The homeowner reported that he was woken up in the middle of the night by a loud unfamiliar sound coming from his front yard. After grabbing his spotlight and heading out to inspect the source of the sound, Davidson was surprised when he realized that one of his trees had cracked and was being kept upright by the neighboring trees.

“Taking quick action was the only way to save the house which stood just a couple of feet from the white pine,” said Davidson when narrating his experience with Milwaukee Tree Service Experts, “The broken 100-foot white pine was being supported by two 50-foot oak trees. The oaks were much weaker compared to the white pine ? this meant that waiting until morning would have given the white pine a chance to break the two smaller trees.”

The homeowner took advantage of the internet and searched online for a team that offered 24/7 emergency tree services in Milwaukee. Luckily for him, he came across Milwaukee Tree Service Experts which had a series of positive reviews from previous customers.

When Davidson called the company at 12:53 AM, he did not expect someone to pick up his call. However, to his surprise, his call was received on the first ring and the company promised to be on his landscape in less than an hour. The company kept its promise, arriving on the landscape at around 1:30 AM.

"It is impossible to plan for tree emergencies," said the Milwaukee Tree Service Experts CEO, "A storm can turn a healthy tree into a ticking time bomb that is waiting to drop on your landscape in a matter of minutes. This was the case with Davidson's tree. He went to sleep knowing that all his trees were healthy and safe but was woken up by a tree threatening to fall on his roof. Luckily for him, the company's team of tree cutting professionals in Milwaukee responded quickly to his request and removed the tree before it fell and caused damage."

Milwaukee Tree Service Experts is reportedly the company that offers the fastest response to emergency tree service requests. The company responds to emergency requests in less than an hour.

Its fast response to emergency tree care procedures has helped the company build its name outside Milwaukee City. For about 5 years now, the company has been handling emergency procedures in suburbs like Elm Grove, Cedarburg, Whitefish Bay, Merton, Shorewood, Bayside, and Brookfield.

"Fast response is not the only benefit customers enjoy when working with the company's emergency response team," said the Milwaukee Tree Service Experts CEO, "Customers also benefit from modern tree service tools and years of tree service experience. When combined, experience and advanced tools ensure that the riskiest trees are brought down safely."

"Davidson's tree was one of the most complicated emergency procedures the company has handled in over 3 years," said the company's CEO, "The team had to figure out how to avoid damaging the house that stood about 10 feet from the 150-foot white pine. Additionally, the team had to come up with a plan that ensured the tree did not break the oak tree supporting it. A combination of cranes, a bucket truck, ropes, and a workable safety plan, made the procedure much easier for the team."

Milwaukee Tree Service Experts base of operation is located at 227 E St Paul Ave #321, Milwaukee, WI 53202, United States. Customers, however, can communicate with the company via +1 414-666-6774 and sales@treeservicemilwaukee.com.
