

Decoy Flocking Unlimited Updates Services for Hunting Season

October 26, 2015

October 26, 2015 - PRESSADVANTAGE -

Decoy flocking kits and services provider Decoy Flocking Unlimited has announced that they have updated their decoy flocking services in preparation for the hunting season.

"We are expecting some major rain and wind storms followed by some cold weather, maybe even snow," says Dan Schultz from the decoy flocking company. "This means that when the duck season opens, it is going to be hugely successful. Having the right decoys in place is vital to a good season, and we have updated our flocking process to make sure that hunters have the best chance of being successful."

The U.S. Fish and Wildlife Services has recently stated that it believes there are some 49.5 million ducks in this country. Greenwing Teal and Mallards are the most popular. This is something that Decoy Flocking Unlimited has also noticed, as there is an increase in demand for decoy flocking kits for those particular types of birds. Additionally, it is known that the highest concentration of birds is in the eastern states of this country, not the west, which is further proof that the upcoming season is set to be a good one.

Due to the fact that this year is an El Nino year, it is believed that Wisconsin will see a much higher influx of ducks. "It seems that ducks have been getting cleverer over recent years as well," adds Dan Schultz. "Whenever we see that many of them congregate together, they seem to be less convinced by decoys, particularly if they are poorly made. Our new flocking system will make the decoys look like new, if not better, again."

Duck hunters are encouraged to visit decoyflockingunlimited.com to have their decoy flocked. Rather than having to purchase new, and very expensive decoys, having them flocked or purchasing a kit to flock them is an affordable and effective alternative. Decoy Flocking Unlimited, a Wisconsin-based, family-run business, has years of experience with waterfowl decoys regardless of the hunter's needs.
