

True Potential Chiropractic Is Offering Chiropractor Services For Car Accident Victims In Beaverton

December 02, 2021

Beaverton, Oregon - December 02, 2021 -
True Potential Chiropractic, an award-winning Beaverton wellness center, is offering chiropractor services to clients who have been in car accidents and are searching online for the best car accident chiropractor Beaverton has to offer.

According to the Oregon Department of Transportation, from 2010 to 2019, there were 6407 total car crashes in Washington County, Oregon, and 5200 people were injured in those accidents. Even if victims did not suffer life-threatening injuries, they might have faced conditions such as whiplash, concussions, or internal bleeding. Many victims may walk away from an accident thanking their lucky stars for the gift of life but there is a good chance that they may have suffered internal trauma that may have remained hidden for days and weeks after the accident. Not all accident injuries are obvious or show external signs immediately but they eventually manifest themselves in different forms further down the road.

At True Potential Chiropractic, its medical professionals have been trained to keep an eye out for injuries that

are going to affect the health of the individual in the long term. They can spot hyperflexion and hyperextension injuries that have the potential of lasting a lifetime if not diagnosed and corrected early on. Concussions, another common injury sustained during car accidents, can affect the entire nervous system of the body, not just the head. Concussions can also occur in the neck as the neck is almost always involved in a hyperflexion or hyperextension injury. The center recommends regular re-assessments to those who have suffered a concussion to document improvements and utilize a professional survey cited and peer-reviewed in over 40 papers.

The medical team at True Potential Chiropractic performs a complete exam that includes specialized on-site digital X-rays to ensure that there is no room for error and the patient has the information they need to be on their way to long-term recovery. The center follows AMA (American Medical Association) guidelines in assessing ligament damage associated with whiplash. In addition, the center?s studies are promptly studied and reviewed by its Chiropractic Physician as well as a Board Certified radiologist (DACBR). Results are then discussed in a personalized report of findings.

A spokesperson for the wellness center talks about its services by saying, ?The body?s healing process is affected largely by the doctor?s diagnostic expertise and their ability to treat the injury. That is why we believe in going above and beyond in providing healthcare services that respect the fragility of the human body and give an accurate assessment of the problems that the patient is likely to face in the future. When you come to us, you are getting top-notch healthcare advice from the most seasoned professionals who know their trade and put out all stops to give the patient holistic treatment keeping in mind their long-term health and wellness. So if you have been in a car accident, work-related accident, or have faced a sports-related injury, give True Potential Chiropractic a call. After one session with our expert medical staff, you will find out why we are the best chiropractors offering corrective care Beaverton has to offer.?

The center also offers a team of Licensed Massage Therapists (LMTs) that play an important role in healing after an accident. All of the center?s LMTs are well trained and specialize in soft tissue injury rehabilitation. Oregon law allows reasonable and necessary treatment by an LMT when prescribed by a Chiropractic Physician. In case the patient requires it, the center can also write a prescription for the LMT of their choice. The center takes care of all the forms that the patient?s insurance requires, ensuring the patient doesn?t have to run from pillar to post to get the treatment they need.

Ture Potential Chiropractic Co-Director Dr. Bryen A. Bell, D.C., B.S., B.Sc. is an award-winning Chiropractic Physician who built his reputation at his Beverly Hills location where he treated numerous Hollywood elites and professional athletes. He has been featured on popular media such as Fine Living, the Style Network, and the TLC Cable Network, just to name a few.
