SHANCO Heating and Air Is Offering Installation For Mitsubishi Ductless Heating Systems In Boise, Idaho

December 02, 2021

Boise, Idaho - December 02, 2021 -
SHANCO Heating and Air, a full-service HVAC contractor, is offering the best solution for ductless heating Boise Idaho has to offer. The contractor is a Mitsubishi Diamond Contractor, which means that it is among a select group of elite HVAC experts who have achieved an exceptional level of training, expertise, and customer satisfaction.

Idaho receives around 18 inches of snowfall on average every year. December is the coldest month with nighttime temperatures reaching a freezing 22.7 degrees Fahrenheit. To prepare for such adverse conditions, homeowners in Boise, and other parts of the state, have to make sure that their homes are well equipped with capable heating systems to keep the homeowners and residents warm during the winter. "We have helped so many customers in cold climates go from costly electric heat to an efficient ductless system. They are quiet, efficient, and extremely comfort no matter what our Idaho winters throw at us," said Brett Shannon, President? of ?SHANCO Heating and Air.

A ductless system is a perfect choice for homes that want comfortable indoor temperatures all through the year. A ductless system both heats and cools eschewing the need to install both a furnace and air conditioner. Mitsubishi is the name in the HVAC industry that makes advanced ductless mini-split systems that offer exceptional efficiency, extended warranties, and a broad array of product options. Mitsubishi is America?s #1 selling brand of ductless systems and customers? top choice in the Boise area as well as nearby areas in Idaho such as Nampa, Meridian, Hidden Springs, Kuna, Caldwell, and Eagle. Readers can find out more about the benefits of installing and using a Mitsubishi Hyper Heat Ductless Mini Split system by viewing the Youtube video: https://www.youtube.com/watch?v=RZmhr63o3Mo.

Ductless heating is a significant upgrade to existing electric baseboards or cadet heaters and they offer a cleaner heating solution when compared to wood stoves or pellet stoves. They are also extremely energy efficient as they come with an ENERGY STAR rating that is a testament to their capability of turning most of

their energy into tangible heating and cooling. A ductless heat pump is also a great option when a house is being remodeled with room additions or existing spaces such as attics, basements, or garages, are being converted into living spaces. Ductless systems also improve indoor air quality (IAQ) as they do not require ductwork and there is no longer a need to force air through dirty ductwork. Homes that experience a heat differential due to inadequate or excess heating or cooling in certain sections of the home can benefit from the installation of a Single Zone Mini Split System. Mini-Splits also have the benefit of being very quiet and compact enough to fit easily on a terrace or patio space.

Hyper-Heat is a newer home heating system designed by Mitsubishi that is the perfect home comfort solution for a range of homes and sizes and has the advantage of being both a heating and air conditioning system that also doesn't rely on ductwork. Mitsubishi Hyper Heat is more efficient (SEER Rating) while heating down to -13° F, and it's also Energy Star rated, making it a perfect fit for a climate where extremely low temperatures are common, such as Boise. Mitsubishi's hyper-heating H2i compressor motor signals that a burst of heat is needed when the temperature gets below 40°F. Depending on the temperature, the motor revs up accordingly and the system absorbs the additional heat thrown off the compressor magnets.

SHANCO Heating and Air is the premier HVAC contractor in Boise that can provide end-to-end solutions for homeowners looking to install a new Mitsubishi mini split heat pump or upgrade an existing HVAC system. SHANCO is featured as a Top Ductless Contractor in the prestigious Ductless Directory, a nationally recognized organization that only accepts contractors that are qualified, factory authorized, and trained in Ductless Installation. SHANCO is also recognized nationally as a Ductless All Star, a designation reserved for the best of the best Ductless HVAC contractors that demonstrate an outstanding commitment and dedication to Ductless Installations. Shannon said, "We always offer free consultations for ductless systems so that we can come out to your place and further educate you on why ductless could be the best choice for your home year round!"

The company is locally owned and operated, all of its technicians are factory-trained and certified, and they use only the most reliable, high-quality, and energy-efficient equipment. The company follows all the manufacturer?s recommendations, code requirements, and federal laws. Readers can call the company at the phone number 208-906-6928 to get a free consultation and estimate.
