

Clipper Construction Is Seeking an Assistant Superintendent in Baltimore

December 01, 2021

BALTIMORE, MD - December 01, 2021 -

Baltimore, Maryland - Clipper Construction, a prominent name in commercial general contracting space in Baltimore, has announced that they are seeking to fill an assistant superintendent position. The qualified applicant should have at least 5 years of general contracting experience, 3 years of which must be with commercial construction specifically. The candidate should also have advanced knowledge of concrete, masonry, carpentry and electrical work as well as an understanding of the rules and regulations of the City of Baltimore. Clipper offers competitive pay, health insurance and generous benefits for employees as well as opportunities to move up within the organization.

The company's Assistant Superintendent is responsible for supervising workers, reviewing blueprints, setting up job sites, and ensuring that work stays within budget. Assistants are also responsible for estimating cost numbers, updating project managers on the status of projects, arguing with architects, and performing the same menial tasks as any normal construction worker. Details about the job can be found at https://clipperconstruction.business.site/posts/3812125489733365776.

"This is a great opportunity for someone who loves to be hands on with the construction process," said the hiring manager at Clipper Construction. "Being a superintendent is a great first step to opening up other opportunities within the industry."

Clipper has been very selective in choosing the best candidate for this opening and they are encouraging those who feel they have what it takes to forward their resume immediately. The company has many ongoing projects that provide applicants with the opportunity to grow their resume with high quality work and interaction with clients and architects.

The assistant superintendent position is a full time job with a competitive salary and excellent benefits. Responsibilities include making sure that concrete is poured in a timely fashion and the right mix, ensuring that contractors do not go over budget on supplies for jobsites, weekly meetings with project managers to update them on progress of work, and coordinating bids for material purchases.

"I look forward to reviewing each and every resume that comes my way," said the hiring manager. "It's going to be a hard choice but I have no doubt we will find someone who will stick out from the crowd."

Many local professionals have been hired by the firm over the years, notably for their dedication to working hard and devoting themselves to providing high-quality construction services. Their hiring process has been lauded as one that focuses on candidate's abilities rather than their pedigree, which has made Clipper Construction one of the most popular choices for many local construction workers.

"We don't value experience over initiative," said their founder. "We want someone who can learn on the job and grow with the company. If you have a lot of experience working in construction, great! We want someone who can learn from our senior superintendent, not an individual who will come in and be set in their ways."

Clipper Construction provides design-build, facilities maintenance and repair, and general contractor services. The firm specializes on collaborating with clients to design, build, and maintain facilities that match their objectives. They are looking for experts in sitework, framing, roofing, demolition, masonry, concrete, drywall, millwork, commercial restaurant kitchens, HVAC, plumbing, electrical, painting, general contracting and energy efficient solutions. Their list of requirements can be found at https://rebrand.ly/construction-superintendent. Clipper Construction provides the highest standards of customer service with project management strategies that are designed to protect their clients' interests throughout the entire process.

For more information about this position please call the main office of Clipper Construction at (443) 323-1880. To apply for the position, assistant project managers can email their resumes to careers@clipper.construction.
