

The New Dentist in Perth Is Now The Applecross Dentist

December 20, 2021

Perth, Western Australia - December 20, 2021 -
The dental practice formerly known as "The New Dentist" located in Applecross, Perth, Western Australia, has been reopened by Dr. Lily Taheri and is now known as The Applecross Dentist. The dental practice has also been rebranded with a brand new luxury fit-out to ensure that patients are even more comfortable. They want to point out that they are ready to provide patients with a glamorous smile using the most innovative and advanced digital technology. With this technology, patients are able to easily visualize and test drive their new smile that they would have after the treatment.

Dr. Lily Taheri, owner of Connolly Dental Boutique explained her excitement for opening her new practice, ?We?re truly excited to launch our new practice and start working with the Applecross community and the patients south of Swan River. Our dental practice aesthetic promotes self care, encouraging self love within a relaxed boutique environment. And I just want people to know that my journey to become the cosmetic dentist I am today has led me to travel and learn from the best in the world. I have been trained by Professor Fradeani and Angelo Putignano in Italy, Didier Dietschi and Pascal Magne in Switzerland, Christian Coachman in New York, and most recently had the opportunity to train under the father of digital cosmetic dentistry, Master Paolo Kano in Brazil.?

The dental practice, previously known as The New Dentist, now offers Digital Smile Design, which means that patients can test drive their new smile even before getting the treatment. Having the ability to visualize the final product can provide the patient with peace of mind before undergoing the dental procedure. Cosmetic dentistry can be used to fix several kinds of problems, such as: missing teeth; discoloured or stained teeth; white spots; crooked teeth; teeth that appear too small for the individual?s liking; teeth that break or chip easily; and misshapen, damaged or decayed teeth.

There are several benefits of cosmetic dentistry for patients. These include: more self-confidence; improved dental hygiene, which prevents cavities and gum disease; no more discomfort when eating; socialising is more enjoyable because you feel better about your appearance; fewer headaches; look younger? bite correction; dental implants, bridges or dentures; procedures are minimally invasive, so recovery time is usually quick; and long-lasting, natural results.

Various types of cosmetic dentistry treatments are offered. These include: stain removal; white composite fillings or porcelain inlays; veneers; dental implants, bridges or dentures; tooth whitening; Invisalign (straightens teeth); and dental crowns.

Invisalign provides clear aligners as an alternative to metal braces for the purpose of straightening teeth. It begins with a simple scan that will be used by the dentist to provide the patient with an image of the future smile after the treatment has been completed. The customised aligners are 3D printed and the patient will wear these aligners for the next six to 18 months while the teeth gradually move into their new position.

Meanwhile, dental implants are placed in the jaw bone for the purpose of providing a durable support for a dental prosthesis, such as a dental crown, denture, bridge, or facial prosthesis. These implants may also be used as an orthodontic anchor.

The Applecross Dentist is proud to announce that they are part of the worldwide dentistry revolution known as Digital Smile Design (DSD), using cutting-edge digital technology. Dr. Lily Taheri, founder and principal dentist at the dental practice, is the first and only dentist in Western Australia who holds the distinction of Digital Smile Design Mastership. Meanwhile, Dr. Zhinus has been working in this particular area for 10 years while at the same time tutoring dental students at the University of Western Australia. They offer various services, such as: DSD, teeth whitening, Invisalign, cosmetic dentistry, dental implants, porcelain veneers, check ups and cleaning, and dermal / facial injectables.

Those who are interested in an Applecross dentist can check out their website. They are open from 8:00 am to 5:00 pm on Mondays and Fridays; from 8:00 am to 8:00 p on Tuesdays and Thursdays; from 8:00 am to 6:00 pm on Wednesdays; and from 8:00 am to 2:00 pm on Saturdays.
