

Electrical Contractor in San Diego Gets Another Five Star Review

December 15, 2021

December 15, 2021 - PRESSADVANTAGE -

Green Electric Solutions, a company based in San Diego, CA is proud to announce that they have recently received another five star review from a customer. They currently have an overall rating of 4.3 out of 5 stars on Google, which means that practically all of the reviews they have received are five star reviews. In the latest review, Erika D. praised the kind of service provided by the electrical technician who installed new electrical wiring for her bathroom remodeling project.

In the customer review, Erika D. said, ?Manny from Green Electric Solutions is awesome! He came out the day after I called to assess the situation with my 80 year old wiring in a bathroom remodel. He was kind and courteous, explained all of my options clearly. He was able to install new wiring suggested a new outlet and ran a new circuit to the panel same day in about 2 hours. I am so happy with the work that Manny did, he is a credit to his trade.?

There are a number of factors that differentiate Green Electric Solutions from companies offering the same services. These include: their professionally and highly trained technicians; always honest, prompt, and reliable service; 24/7 availability of their residential and commercial electrical services; safety as their top

priority; free estimates; 60-minute service; fully insured electricians; details upon request for warranties; written guarantee for work done; free over-the-phone assistance; and free home inspections.

One of their important services is the provision of surge protection for electrical systems. This requires a surge protector that is a device that is designed to provide protection for the various electronic gadgets and devices from sudden increases in electrical current. Any kind of electrical or electronic device, particularly those that have circuit boards, are prone to damage by spikes in the electrical current. Surge protectors can be used to counteract those spikes, thus protecting sensitive electronic devices, such as computers, washers, microwaves, home theaters, dryers and others.

Another important service that the Green Electric contractor company can help with is the prevention of electrical fires. Although the winter season is supposedly not the time when home fires are prevalent, there are still a number of possible causes of electrical fires. For instance, there is the space heater, which can cause a fire if it is not properly placed. Space heaters and other appliances need sufficient ventilation in order to work efficiently and to prevent fires. It is also important to ensure that heaters are not positioned too close to those items that are flammable, such as curtains, paper, furniture, and other flammable materials. Professional electricians can offer a free home safety inspection and they can offer advice to the homeowners on how to maximize the safety of their homes.

And, of course, a common requirement of homes is electric lighting. When the electric lighting doesn't work, the problem might be caused by burned out bulbs, a broken switch, or a broken fixture. Oftentimes, the homeowner would be able to fix the problem. However, if it turns out that the source of the problem cannot be determined, it is time to request for help from a professional.

Founded in 1985, Green Electric Solutions is a full-service electrical contracting company that serves residential, retail, real estate, contractor, and commercial clients in Southern California. They are committed to applying the most advanced technology, top quality products, and the best possible customer service. They ensure competitive pricing and fast and efficient scheduling and excellent service through their highly trained technicians. They are available 24 hours a day, seven days a week, and they are supported by a fleet of completely equipped vans and a crew of licensed and skilled electricians. They are ready to respond promptly to both routine and emergency service needs of customers. They have greatly expanded their number of offices lately and one of the newer locations is their El Cajon CA office.
