

Roof.net Gives Advice About Roof Replacement in Lake Manassas

December 20, 2021

Fairfax, Virginia - December 20, 2021 -

Roof.net is a contractor that has established a solid reputation when it comes to doing such tasks as roof replacement in Lake Manassas. Part of the reason for this is the way they use their many years of roofing experience to give their customers sound roofing advice. The company owner, Ken Briesemeister, says, ?Not everyone that calls us to take a look at their problematic or aging roof needs to have that roof replaced. Sometimes other repairs can be done to prolong the life of the existing roof. After we inspect a roof, we will use our many years of experience in this business to help our customers make an informed decision as to whether or not it's time to get their roof replaced.?

Briesemeister went on to say that there are a few factors that play a major role in determining when it's time for a roof replacement. One of those is the frequency with which repairs are now having to be done to a roof. He mentioned that a customer that is having to have roof leaks repaired every few months is spending money that could be used towards a roof replacement. Other signs that indicate it may be time to consider replacing a roof include shingles that look old, worn or are starting to get gaps or holes in-between them. The company owner added that if a roof is over 15 years in age, then a customer should probably lean towards roof replacement as opposed to undertaking any other types of expensive roof repair. Whole roof replacement is

the best way to guarantee that a roof will be watertight and problem-free well into the future. He said that he is always happy to meet with a customer in person and get up on their roof and perform a thorough inspection. At that time, he will even take photos that will help a customer with their roof replacement decision. The company owner stated that once a customer has decided that a roof replacement is in their best interest, they can expect the techs at Roof.net to do the highest quality work possible for them and only have the best roofing materials used in the process. All of their roof replacement work comes backed up with a generous warranty and the job will not be considered to be complete until a thorough cleanup of the worksite has been done.

Customers that choose to have Roof.net do their roof replacement work for them will be getting that work done by one of the highest-rated contractors on the east coast. Here are some reviews taken from the company?s Google Maps Business Listing which highlight why customers are so satisfied with its roof replacement services. Jennifer FitzGerald stated, ?We had a great experience with roof.net for our roof replacement. Ken was extremely responsive over text and email and even provided status updates and pictures on installation day. The entire process from start to finish was very smooth and easy. The installation crew was great and cleaned up everything really well. Our new roof looks great! Highly recommend!? Michael Harrison proclaimed, ?Outstanding service from first contact to last. My roof needs were thoroughly analyzed and explained to me along with how they would be addressed. Then ?boom? I had a great new roof. Ken was great to work with and his team of workmen were excellent. I highly recommend this company for roofing needs.? Roof.net is that rare company that manages to maintain a perfect 5 out of 5-star average review rating on its GMB Listing. Something that becomes even more telling given that the company has had over 450 reviews left on that listing.

Current and past Roof.net news regarding this 22-time national award-winning company can be found in their media room. Those in Lake Manassas and other areas of Northern Virginia that require quality roof replacement work can contact them by phone, email, or by using the form that?s found on its website.
