

VinousQ Reveals Why Their Wing Corkscrew Wine Opener Is The Perfect Gift Compared To Others

November 24, 2015

November 24, 2015 - PRESSADVANTAGE -

VinousQ, a wine focused company based out of California, has stated why their manual wine opener is the better choice when compared to electronic models. The company has made it clear that they believe there are various problems with battery operated alternatives, and hope to educate the public on the benefit of a manual model cork screw. Furthermore, in celebration of Thanksgiving, VinousQ has offered a \$3 off promotion code for readers. Customers can enter the code "DEALSHOP" to receive the discount on Amazon.

The company's Assistant Manager, Spectar Que, has said the following in regards to this comparison: "Electronic Openers may look fancy, but they are far from perfect. Many mechanical defects are beneath the pretty plastic case. Plastic gears, broken motors, defective batteries and faulty wiring are all common issues that all modern home kitchen appliances face."

Aside from the breakdown of motors following an expired warranty, VinousQ has also reported that the cost

many individuals face to repair faulty wiring or specialized batteries can be more money than the value of the product itself. This leaves many consumers overspending on something as simple as a wine corkscrew, and still not receiving superior quality for their money.

Limited battery life is another issue that consumers encounter when faced with electronic models of a wine opener. Single charge batteries mean constant replacing, and VinousQ has hinted that this is particularly inconvenient during travel, or if the opener is being taken to a party or other social gathering, where additional batteries may not be at the ready. Traveling and transport may also be a hassle when using an electric corkscrew due to the bulky size, which is required to house internal components and electronic features.

On the subject of how the manual VinousQ model eliminates many of these issues, Spectar Que writes: "The corkscrew possesses metal gears that do not breakdown easily, and with no battery, the user can utilize the device worry-free of battery life. Also, the nonexistence of a motor and wiring mean that the related issues do not exist either."

VinousQ's corkscrew is designed to be travel friendly with its light weight and slim nature making it convenient to transfer from place to place. An added benefit, which the manual model includes is a bottle opener, for beer and other beverages with bottle caps. For more information on the VinousQ wine opener, the company invites consumers to visit them online.
