

Great Lakes Building Concepts & Roofing Company of Grand Rapids Launches New Metal Roofing Division

December 27, 2021

December 27, 2021 -
Grand Rapids, Michigan - Great Lakes Building Concepts & Roofing Company of Grand Rapids is happy to announce the launch of a new metal roofing division. This is an important development for homeowners and other building owners in Grand Rapids because winter in this city can get very cold, which implies that most roofing companies are forced to stop their work because asphalt shingles cannot always be correctly installed at sub-freezing temperatures. The advantage of metal roofs is that these can be installed at any time of the year because they don?t have to adhere to the roof in the same manner as an asphalt or composite shingle has to. This new metal roofing division allows them to offer roofing installation services all year round in Grand Rapids.

A spokesperson for Great Lakes Building Concepts & Roofing Company of Grand Rapids says, ?Metal roofs can last 50+ years, and are one of the most durable roofing materials on the market. For this reason, we have decided to increase our efforts in metal roofing to ensure all local homeowners are taken care of. This metal roofing department will allow GLBC to better serve the Grand Rapids metro including downtown Grand Rapids, Eastgate, Eastown, Ottawa Hills, South Hill, Alger Heights, Heritage Hill, East Hills, Medical Mile, West Grand, Fulton Heights, Creston Heights, and nearby neighborhoods.?

There are a number of factors that make GLBC of Grand Rapids stand out among the various roofing companies in the area. These include the: available lifetime warranties, 50 percent discounts; financing options that can be as low as $97 per month; bonded, licensed and insured company; A+ BBB rating; and hundreds of highly positive five-star reviews.

Great Lakes Building Concepts & Roofing Company of Grand Rapids offers roofing services, such as roof installation, replacement and repair services to both commercial and residential customers. Their roofing contractors are experienced in all kinds of roofing, such as hip roofs, sloped roofs, vertical surfaces, and flat roofs.

For residential customers, they offer: roof replacement services, roof repair, storm damaged roofing services, roof installation services, emergency roofing, siding replacement, window replacement, and gutter replacement. For commercial customers, they can provide: commercial flat roofing, TPO roofing, EPDM rubber roofing, roof coatings, roll roofing, and PVC roofing.

For metal roofing, they offer metal roof installation, metal roof replacement, metal roof repair, and metal roof storm damage services. Metal roofing offers various kinds of advantages, such as: longevity, because metal roofs can last for 40 to 70 years, depending on the material; durability, as long as it has been installed properly, having the capability to withstand wind gusts of up to 140 miles per hour; safety, because metal roofs won?t burst into flames; energy efficiency, because metal roofs can reflect the sun?s infrared and ultraviolet rays, resulting in a 10 to 25 percent reduction in cooling costs; and the fact that metal roofs are environmentally friendly. However, there are some disadvantages of metal roofs, including: the fact that metal roofs can cost two to three times more than other roofing materials; noisiness; possible problems with fasteners due to changes in temperature; and rust issues.

Recently, they have announced the opening of a new office in Grand Rapids. This was revealed in a press release that can be accessed at https://www.pressadvantage.com/story/47135-great-lakes-building-concepts-roofing-company-of-grand-rapids-announces-opening-of-new-office.
