

American Mechanical & Plumbing Service Celebrates 19 Years as Dealer of Goulds Pumps

December 27, 2021

December 27, 2021 - PRESSADVANTAGE -

American Mechanical & Plumbing Service Inc., a company based in Hollis Center, Maine, is happy to announce that they are celebrating 19 years as a dealer of Goulds well and water pumps in Southern Maine. The American Mechanical & Plumbing well pump service they provide is available for various towns in Maine, including: Alfred, Arundel, Biddeford, Buxton, Cape Elizabeth, Cornish, Dayton, Falmouth, Gorham, Hollis, Kennebunk, Kennebunkport, Limerick, Limington, Lyman, Newfield, Old Orchard Beach, Portland, Raymond, Sanford, Scarborough, Sebago, Standish, South Portland, Waterboro, Westbrook, and Windham.

Jeff Briggs from American Mechanical & Plumbing Service says, "We are certainly glad to be celebrating our 19th year as Goulds pump dealer. These pumps have an excellent reputation because of their highly positive customer reviews due to the high quality of these pumps. These pumps are vital for the proper functioning of a well to provide water for the home or business. Whatever problems you face with your well, you can count on American Mechanical & Plumbing's pump installation and repair specialists to handle your needs with care and efficiency. We will ensure that your water pump is running correctly and that your schedule won't be affected after any setbacks like a lack of household water."

The Goulds submersible well pumps available from American Mechanical & Plumbing Service are 4-inch and 6-inch well pumps. These below ground pumps have been designed for home and small municipal water supplies, including light irrigation systems. One example of a four-inch submersible pump available is the G Series Slimline Submersible Pumps (5, 7 and 10 GPM) (1/2 to 1 1/2 HP ? VFD Compatible). This has a flow GPM range of 1 to 12 and a head FT range of 100 to 900. An example of a six-inch submersible pump is the L Series Submersible Pumps for 6" and Larger Wells, 3 - 60 HP. Its features include: improved efficiency, which means lower life cycle costs and decreased energy consumption; all stainless steel construction, which implies that there will be no water contamination from paint or rust; tungsten carbide support bearings that offer excellent radial shaft support; superior sand handling design for longer life and less repairs; modular design, which means it is easily and quickly rebuilt when maintenance becomes necessary; Cast 304 SS Discharge Head and Motor Adapter, which are more robust than fabricated pump designs and offer strong connection points for the motor and piping.

They also offer various kinds of jet pumps from the Goulds Water Technology Jet Pump product line, particularly those models designed for use in homes, cottages, farms, or booster services. These are the shallow well jet pumps, convertible jet pumps, deep well jet pumps, and jet pump and tank pages.

One example of a shallow well jet pump is the BF03S, which has a flow GPM range of 3 to 9 and a head FT range of 40 to 118. This has been specifically designed for small homes, mobile homes, and camps. Features include: self-adjusting capacity; compact; tankless; exclusive air handling ability; protected mechanical seal; easy to service; back pull-out design; powered for continuous operation; and corrosion resistance.

An example of a deep well pump is the SJ Deep Well Pump. It has a flow GPM range of 22 to 162 and a head FT range of 46 to 139. This has been designed for homes, cottages, and farms. Features include: NSF 61 certification; high capacity and pressure; stainless steel pump shaft; easy to service; corrosion resistance; powered for continuous operation; easy to prime; and adjustable automatic pressure control valve.

American Mechanical & Plumbing Service Inc. has been in business for over 10 years. They specialize in sewage and well pumps, and also in water softeners, water filtration, and reverse osmosis systems. They have developed a reputation of being a top provider of water filtration services and also are a factory-authorized Goulds pump dealer. They provide sales, installation, and service of heating and plumbing products.

Those who are interested in Goulds jet pumps and other products offered by American Mechanical & Plumbing Service can check out their website, or contact them on the telephone or through email. They are

open from 8:00 am to 6:00 pm, from Monday to Friday.
