

# Tree Loppers in Cairns Now Offering a Wider Variety of Professional Tree Services

*December 31, 2021*

Cairns, Queensland - December 31, 2021 - PRESSADVANTAGE -

Cairns Tree Lopping Pros in Queensland has seen a dramatic rise over the last few years in the number of requests that they receive for their professional tree services. Much of this is due to these tree loppers in Cairns having built a solid reputation by offering quality tree services combined with well above average customer service. It also does not hurt that they perform a well-rounded selection of essential tree services. That means that those home and property owners that live in Cairns, Edmonton, Gordonvale, or in other nearby Queensland areas only need to know one number to call to get any type of tree work done.

A spokesperson for the company, John Edwards, says, "When we first started in this business, we made the decision that we were not just going to specialize in one area of tree work. We even took that one step further and decided if we were going to offer a wide variety of specialty tree services that we were also going to make sure that we were the very best in our area at doing them. The way that our Cairns area business has grown over the last years shows what type of commitment we have made towards achieving that previously-mentioned goal."

Edwards went on to talk about how part of their success is due to their crews being led by knowledgeable and experienced arborists. This is ultra-important when comes to tree lopping and pruning. That's because it takes superior tree knowledge and experience to know what time of year to trim certain species of trees and how to trim them in a way that is not harmful to their future growth. He said their crew leaders also know how to spot and remove branches on trees that are diseased, insect-infested, or dying to keep the rest of the tree healthy. They also recognize the best way to shape trees to maximise their looks and to properly thin out their foliage so essential moisture, sunlight, and air penetrate deeper into a tree to keep it healthy.

The company spokesperson also discussed how they are experts when it comes to removing even the largest size trees in Gordonvale and the surrounding areas of Queensland. Something that's possible not only because of how well-trained and experienced their crews are at felling trees but also because they have

the state-of-the-art equipment that's necessary to do this job and they follow a strict set of safety guidelines while performing it. He added that they can also do stump grinding or stump removal after a tree has been removed which will help reclaim the ground area where a tree once stood. It was also brought up that the crews at Cairns Tree Lopping Pros respond very quickly to any tree emergencies that they are asked to help out with and they have the manpower and equipment that's necessary to clear even the biggest lots.

Those in Cairns and elsewhere in Queensland that have used Cairns Tree Loppers service have expressed extreme satisfaction with the results. John Edwards from Cairns stated, "We were not only able to get an on-site quote for our detailed cutting, hedging, lopping, and removal work very quickly, and at an excellent rate, but also secured a timeframe for the work just after a week of bad weather cleared. (not as easy as it sounds). The team arrived right on schedule, fully equipped with a large truck full of tools & huge woodchipper and with a full crew to maximise efficiency and minimise time." Another Cairns resident, Noel Sanders proclaimed, "Made a phone call and they had their tree loppers out the following morning and right on time. They took a lot of care in trimming our Palms making sure they didn't damage the trunk and only used ladders for climbing. Great clean-up on completion of the work."

Edwards went on to say that they are happy to meet with any home or business owner to discuss what the trees on their landscape require and provide them an estimate for that work. He also pointed out that more details as to how they go about performing the many different tree services that they offer can be seen on their website.
