

## **Tree Care Service Provider in Colorado Springs Gets Another Five Star Review**

*January 10, 2022*

January 10, 2022 - PRESSADVANTAGE -

Green Empire Tree Service, a certified residential and commercial tree care company offering their services in Colorado Springs, Colorado, is proud to announce that they have recently received another five star review from a satisfied customer. Services offered include tree pruning; brush chipping; insect management; stump removal; recurring maintenance; tree removal; emergency services; services for hedges, shrubs and bushes; disease management; and tree planting. Whether customers are planting new trees in a growing development or want to do some structure pruning for mature trees in an established neighborhood, their team of certified arborists can help.

In the above-mentioned review, Rebekah G. said, "Mike was able to take a look at my trees and provide me with an estimate within only a few days of me initially contacting him. He and his team cut down two dead trees on my property and were able to prune back and save another tree that was in poor health. The team worked quickly and efficiently (they managed to do everything in about 3 hours), and were very respectful of both my property as well as the rest of the neighborhood. Mike was able to give me some great recommendations on how to care for the other trees on my property and as well as some suggestions on what would be good to plant in the future. This company is very passionate about the work they do; I would

highly recommend them.?

Currently, Green Empire Tree Service has an overall rating on Google of 5.0 stars, which means virtually all of the customer reviews they have received are five star reviews. A spokesperson for the company says, "We're certainly proud and happy of receiving another five-star review from one of our customers. We believe that this is the result of our efforts to always put the customer first and ensuring that they are fully satisfied with the service that we provide. We are eager to accept any kind of feedback from our customers because it allows us to gauge how we are doing in our goal of providing total customer satisfaction. We want to thank our customers who have taken the time to write a review. We appreciate it."

Tree pruning is an important service that they offer because it has several benefits. The most important benefit is that it keeps people around the tree safe, including buildings and electric power lines. By getting rid of tree branches that are weak and may fall on people or property, there would be less risk of accidents. However, the task of pruning itself can be dangerous, which is why it is advisable to let the professionals do the pruning and avoid making it a do-it-yourself project especially if one does not have sufficient experience and the tools to do the job properly and safely.

Tree removal may also be necessary for a number of reasons. Although a tree can offer a lot of benefits, such as making the surroundings look more attractive, provision of shade, and contributing to oxygen in the air that people breathe, there may be times when a tree has to be removed. For instance, an old and decaying tree may already cause more harm than good because it may carry diseases that can transfer to other trees or plants or its branches may have become too weak and are in danger of falling down. For such situations, a certified arborist is needed to determine that tree removal is really required and to perform the removal safely and properly.

Green Empire Tree Service is a certified, insured, and licensed tree care company providing a broad range of commercial and residential tree care services. They are committed to providing quality work at fair prices. Their team of local arborists have more than 35 years of combined years of experience of servicing the Colorado Springs area. They always ensure that they are compliant with the ANSI A300 pruning standards. They also make sure that the safety of their customers and workers are the top priority and that they always comply with OSHA regulations.
