VinousQ has recently released an article expressing why their wing corkscrew is considered to be of the highest quality. The product can be found through the company's website online. The corkscrew is marketed as a gift item with unique qualities which also make it preferable for travel, and home parties.

Currently the rating on the cork screw through sales channels is high, with one satisfied customer, Katie J, describing it as follows: "This is a huge improvement on the standard corkscrew. The screw is beveled so it pierces easily and cleanly into the cork. It has a no slip grip so it is comfortable and provides traction even with wet hands."

In the article made by the company reflecting the quality of the product, VinousQ lists 5 reasons why customers should agree, the first being that most wing corkscrews are created using flimsy materials that deteriorate quickly over time. These are often small and difficult to operate; the company believes that their model is created using more durable materials, and is a larger and sturdier build.

The second reason listed for the wine opener by VinousQ to be considered as high quality is in regards to the auger of the screw, which is created with a sharp and smooth tip, which can be easily inserted into any cork. This allows the screw to enter and twist into the cork in one easy motion without the fear of small pieces floating down into the wine.

Along with its ability to open wine bottles swiftly and conveniently, the ring insert on this brand of corkscrew is crafted in such a way that it will not loosen and fall off as it is used. It works as a cushion to rest the wine opener against as it works. An additional component on the tool also works to remove beer bottle tops, making this a two in one product.
