

True Potential Chiropractic

By: Reiko K.

Drs. Bell and Mennell are masters of their art! The staff is friendly and always helpful. I really look forward to my adjustments. Within a few visits I was able to pull myself up from laying down without help. I swear I'm taller now. And my lungs can take in more air--I've been able to sing longer notes without struggling to breathe. They are all on top of their health and cleanliness practices, wearing masks and cleaning the tables thoroughly after each adjustment. I feel safe and protected during my visits.

True Potential Chiropractic Helps Those Searching For "Personal Injury Chiropractor Near Me" In Beaverton, OR

January 19, 2022

Beaverton, Oregon - January 19, 2022 - PRESSADVANTAGE -

True Potential Chiropractic is helping patients who are searching online for "Beaverton Personal Injury Chiropractor Near Me" get the help they need to recover and move on from accidental injuries.

According to Oregon State's official website, each year, about 3,000 Oregonians die and 18,000 are hospitalized as a result of injury. Injury is the third overall leading cause of death in Oregon, the leading cause of death among Oregonians aged from 1 to 44, and it is the leading cause of potential years of life lost. Each year 60,000 years of potential life (YPLL) are lost due to injuries. According to a CDC estimate from 2014, the economic cost of injuries in Oregon was around \$2.7 Million.

Injuries are classified by the intent, whether it was unintentional or intentional, and the manner of the injury, whether it was a motor vehicle accident, caused due to a slip and fall, etc. Those who have borne the brunt of the carelessness or malicious intent of an offending party can find themselves saddled with injuries that

drastically affect their day-to-day capabilities and severely reduce the quality of their lives. Victims of a mild or life-threatening injury often have a tough road ahead of them when it comes to recovery, depending on their overall health, age, and gender.

It becomes very important and urgent to seek medical help from professionals who will help the victim understand their injuries and rehabilitate themselves by following the proper recovery techniques. There are many options that victims can seek to get started on the road to recovery and each of them has its own pros and cons depending on the patient's comfort level. Chiropractic is one of the most prominent natural, safe, and non-invasive solutions that can be considered by personal injury victims who are looking for options to alleviate their pain and get better.

For patients that choose to reap its benefits, the chiropractors at True Potential Chiropractic are offering the best chiropractic treatments for corrective care Beaverton, Oregon, has to offer. The clinic's primary chiropractor Dr. Bell has over 20 years of experience delivering excellent results in injury rehabilitation. Dr. Bell served for many years from his Beverly Hills location where he treated numerous Hollywood elites and professional athletes. Dr. Bell has been previously featured on popular media outlets and programming such as Fine Living, the Style Network, and the TLC Cable Network, just to name a few.

The doctors at the clinic perform complete and exhaustive exams using specialized X-rays to check for injuries that can have long-term health effects such as whiplash and concussions. The clinic can also set up recurring assessments to monitor the patient's progress and the increasing or decreasing severity of hyperflexion or hyperextension injuries that often go unnoticed for several weeks or months after the accident, in case the initial diagnosis was performed by an inexperienced medical practitioner.

The clinic also provides the services of LMTs (Licensed Massage Therapists) who are duly trained and specialize in soft tissue injury rehabilitation. The clinic's chiropractors can also write a patient a prescription if they want to get their treatment from an LMT of their choosing.

True Potential Chiropractic services are known to be effective against a range of complaints such as aging issues, arthritis, auto accident injuries, balance issues, carpal tunnel, chronic fatigue, chronic pain, concussions, disc conditions, extremity pain, frequent colds, gamers' posture, hand and foot numbness, headaches and migraines, inflammation and swelling, knee pain, leg numbness, limited motion, low back pain, military injuries, muscular issues, neurological conditions, pediatric orthopedic complaints, pregnancy issues, sciatica, scoliosis, shoulder conditions, sports-specific injuries, stress, tendonitis and soft tissue issues, temporomandibular joint dysfunction (TMJ), work-related injuries, and whiplash.
