

3rd Rock Addresses The 'Does A Brain Enhancing Pill Actually Exist' Question

November 03, 2015

November 03, 2015 - PRESSADVANTAGE -

3rd Rock Products, a supplement and health company based out of Laguna Beach, California, has recently spoken out in the name of natural alternatives to pharmaceuticals, about whether a brain enhancing pill actually exists, as well as the legitimacy of brain supplements. The company is best known for the work they have done with their own brand of pills called Steady Focus, and their efforts to improve the mental alertness and physical energy of consumers.

While there are a variety of products on the market which work to energize and motivate brain activity, 3rd Rock Products has made it clear that clinical trials have demonstrated that they have developed a natural alternative with ingredients, which allow it to function more successfully. Along with the caffeine, which most energy drinks and coffee beverages provide, Steady Focus incorporates L-Theanine into the mix. This added ingredient may provide a sense of calm and relaxation that works against the jittery alertness resulting from the caffeine, to create a blend that allows for enhanced energy and natural thought flow.

The company has seen much success through the sales of their brain enhancing pill, with customer reviews being positive, and rankings primarily landing in the category of 5 full stars. One such satisfied customer wrote on the company sales website, saying: "I am a big fan of anything that is said to boost energy and help me remain alert and focused. I like energy drinks, but I do not need all the extra sugar and the crash when they wear off. These pills are a perfect alternative. They are easy to take, they give me the energy that I need, and there is no crash when they wear off. I take them when I'm at work to get through long boring afternoons. I also use them in the evenings when I should be doing things like dishes and laundry and I'd rather take a nap."

The capsules are sold in bottles of 60 and are suitable for vegetarians, containing all natural and non-pharmaceutical ingredients. For more information on 3rd Rock Products or Steady Focus, the company invites consumers to visit them through their online sales portal.
