

Lake Road Electrical Offers Home Electrical Safety Inspection Without Charge in Auckland New Zealand

January 20, 2022

January 20, 2022 - PRESSADVANTAGE -

Lake Road Electrical, a company based in Auckland, NZ, owned by Lewis Rudall, who serves as electrician and director, is offering a home safety inspection without charge for homeowners in Auckland and neighbouring areas. He is a master electrician and specializes in upgrades for electrical switch boards. He is very much concerned about safety and therefore offers a no obligation electrical safety inspection without any charge for any home located within 10 km of their offices.

Lewis Rudall is a well loved electrician in Auckland not just because of his concern for safety but also because of the high quality service that he provides. They have an overall rating of 5.0 stars on Google and in one of the latest reviews, Vanessa J. gave them a five star rating and said, "Lewis installed an outdoor power point and a switch to power our outdoor festoon lights. From the initial consultation he offered ideas and advice which were much appreciated. He carried out the work better than we could have hoped for on time and we are so happy with the result. Would not hesitate to recommend Lewis."

Lewis Rudall wants to express his gratitude to all customers like Vanessa who have taken the time to write a review. He says, "Customer feedback, whether good or bad, means a lot to us because it allows us to gauge our progress in our customer satisfaction goals. If the feedback is negative, it tells us what we need to improve on. If positive, it tells us that we are on the right track. So far, our customer feedback have been mostly five-star reviews. And for those who still don't know us, check us out. Visit us on Facebook."

Lake Road Electrical specializes in switchboard upgrades because this is essential for the safety of the home and the family. Old switchboards are not equipped with residual-current devices (RCDs) to protect people from electrocution. An RCD is a residual-current circuit breaker or a circuit interrupter in case there is a ground fault. It can help prevent serious injury from an electric shock and protects equipment. Old switchboards are also not equipped to handle the modern demands for electricity.

Other services provided by Lake Road Electrical include: meter board relocation, rewires, lighting solutions, repairs and maintenance, data cabling and networking, outdoor and garden lighting, and renovations and extensions.

They can help homeowners in upgrading their lighting, using strip lighting, low glare CRI down lights, efficient LED lights, sunset dimmers, or feature lights. They offer advice on choosing what is appropriate for the home based on the budget and preferences of the customer. Lighting has both physiological and psychological effects. They have experts in electrical systems and lighting design to ensure an effective lighting approach for the home. This concerns not just the indoor lighting but also lighting for pathways, the driveway, garden, doorways, and entertainment areas.

And because prevention is always better than repairing an electrical system that has broken down, they offer electrical maintenance and repair services. Not only will they provide high quality repairs based on the home's current and future electrical power usage, they also determine what the property needs and anticipate any potential issues and prevent them before they occur.

They also provide data cabling and networking services for the needs of the home office and provide upgrades to the old networking infrastructure. And ensuring that the electrical system of the home or property can cope with the updated electrical needs after a renovation or extension is also essential.

Lake Road Electrical is a family-owned and operated business in Auckland with the owner, Lewis Rudall being fully qualified as an electrician in both the UK and New Zealand. He is knowledgeable and experienced in electrical installation and commissioning in domestic, industrial, and commercial buildings.

Those who are interested in learning more about the electrical services provided by Lake Road Electrical can check out their website at <https://lakeroadelectrical.co.nz>, or contact them on the phone or through email. They can be contacted 24 hours a day, from Monday to Saturday.
