Olympus Mobile Tyre Fitting Offers Mobile Tyre Service and Road Assistance

January 19, 2022

January 19, 2022 -
Olympus Mobile Tyre Fitting, a company based in Hertfordshire, UK, is offering mobile tyre service and road assistance in Hertfordshire and North London. Whether it is an emergency or a planned tyre fitting, they can go the location of the vehicle and change the client?s vehicle tyres. This means that clients need not worry about going to an auto repair shop, which is especially convenient for those who have a blown-out tyre and can?t go anywhere while the tyres are not yet repaired. For car owners who are proactive, they can request for a mobile tyre fitting and the professionals from Olympus can go to where the vehicle is located and provide the service.

For those who have a punctured tyre, Olympus Mobile Tyre Fitting can go to wherever the car is located and repair the punctured tyres as long as the puncture is repairable. After fixing the tyre they will check to ensure that it complies with British standards. However, the old tyre may no longer be repairable, which is why they will ask for the size of the tyre before they go to the location of the car. They can provide emergency tyre fitting for those who have a flat tyre or have experienced a tyre blowout on the road. They can reach the affected car in 60 to 90 minutes for cars who encountered a punctured tyre in Hertfordshire, London, and Essex.

Antonio Preka, owner and founder of Olympus Mobile Tyre Fitting, says, ?A flat tyre, puncture, or blowout may feel like the end of your day?s plans, but we can get you back on the road in no time with our same-day mobile tyre fitter service. Get your tyres replaced right away, 24 hours a day. We will come to your business, the highway, the roadside, or the driveway to replace your tyres, so you won?t have to cancel your plans. We offer a one-of-a-kind mobile tyre installation and replacement service. With rapid service, our 24-hour emergency mobile tyre-fitting service covers all of London and the neighbouring areas, particularly Hertfordshire and West Essex.?

Olympus Mobile Tyre Fitting can also offer assistance to those who have difficulty in removing the wheel

locking nut. They can provide this service 24 hours a day, from Monday to Sunday. They are able to remove locking wheel nuts in a safe manner, without scuffing or harming the wheels, tyres, or alloys for all vehicle brands. The tools they use can apply a grip on the damaged or locked locking wheel nut, enabling them to remove any locking wheel bolts, wheel nuts, rounded off lug nut, without causing damage to the wheels. In the event that the original lock has been lost or can no longer be used, they will use a tool to break the lock?s head, which permanently destroys the wheel nut and therefore will need replacement.

They will use the spare tyre and jack on the boot compartment of the car with the locking wheel nut tool. A locking wheel nut remover will be required for those who have a flat tyre to repair, service, or replace. The professionals from Olympus can offer assistance to the car owner when they can?t locate the lock or have damaged locking wheel nuts

Olympus Mobile Tyre Fitting, which is owned by professional tyre fitter Antonio Preka, has been providing mobile tyre fitting services for 10 years. He has Level 2 diplomas in vehicle fitting principles, specialist tyre fitting competence, and vehicle specialist tyre fitting principles. He has also earned a Level 2 extended certificate in vehicle technology. Olympus can provide various kinds of tyre services. These include: tubeless tyre fitting & removal, tyre fitting & removal, practical tyre servicing, commercial vehicle technology, health & safety in the commercial tyre environment, wheel security, and tyre service management.
