

Great Lakes Building Concepts & Roofing Company Announces Launch of New Financing Program

January 28, 2022

January 28, 2022 -

Michigan based Great Lakes Building Concepts & Roofing Company of Grand Rapids (GLBC) is pleased to announce the launch of a new financing program. Aware that their community has endured numerous difficulties in recent times, the company has been hard at work developing a new system that would allow their customers to get their essential roofing projects completed without overextending their present financial capabilities. Today, they are proud to unveil the result of this work: a new financing program that means their community no longer has to postpone any work they need done.

According to the company, houses in the area may suddenly require small repairs or have their roof develop a leak quite unexpectedly. However, despite being relatively minor inconveniences, they can turn into much more expensive problems if not addressed in a prompt manner. As a result, the company encourages their community to contact their team immediately if they require any assistance in this regard.

GLBC also understands that, despite the fact that small repairs are less costly than full-scale emergencies, they may still be beyond the budget of many households. As such, they are pleased to offer their customers peace of mind in being able to work with a top rated Grand Rapids roofing company while making use of

numerous payment plans and options.

For instance, customers who reach out to the company for more information will quickly discover that these new financing options include both 0% and Same as Cash Financing ? along with many other discount options that are designed to help keep homeowners afloat. GLBC also takes a great deal of pride in giving back to active and retired veterans, and this is reflected in their generous military discounts. Senior citizens have not been forgotten either. As one of the most vulnerable populations in the country, the company has seen this part of their community endure much in the past few years. In addition to this, they recognize that senior citizens are more likely to be on fixed incomes. In response, the company has ensured no one is left without the services they need by implementing a series of senior citizen discounts that take these conditions into account. They encourage their community?s seniors to contact their office if they have any further questions in this regard.

GLBC clarifies that this is true for anyone who would like more information about the new financing programs. The company has always placed a high priority on maintaining a strict standard of customer service, and they believe this is now more important than ever. No matter how stressful a situation may be, the team at Great Lakes Building Concepts makes it their mission to make every project as hassle-free as possible.

Notably, customer feedback for the company has been universally positive in nature. On the Google platform, for instance, they boast a full 5-Star rating, and the content of these reviews serves to illustrate how dedicated the team is to their craft.

Marie B. comments here, ?I can tell you that not all roofing companies are alike. Replacing a roof is a major undertaking, don't make the mistake of hiring a cheap roofer! I will tell you that Great Lakes Building Concepts is the company you need to contact. This company knows the benefits and features of all the shingles and metal roofing materials they carry. From my first contact with Aaron to dealing with our foreman, I was communicated with constantly and given outstanding customer service by all involved. I was walked through the entire sequence and told what was going to be done.?

The review concludes, ?They were nothing short of professional to the very completion of my project. Everything was protected by barriers and clean up was continuous throughout. You'll be pleased if you choose these Grand Rapids roofers.? View more reviews from the company?s delighted customers at the following link: https://goo.gl/maps/ct2x9rjtWNJpKCDi8.
