

John French Landscape Designers Is Offering Landscaping Services In Eltham, VIC

January 21, 2022

Eltham, Victoria - January 21, 2022 -
John French Landscape Designers is providing the best top-of-the-line services for landscape design Eltham, VIC has to offer. The company also serves the nearby Melbourne suburbs of Mooroolbark and Croydon.

The company handles all aspects of the landscape design process, from the initial consultation to the final construction of the project. The company specializes in turning a blank natural canvas into a work of art that respects the natural geography and plant life thriving in the space while elevating it to a level that will appeal to the home or property owner?s unique design sensibilities.

The company recommends a one-on-one consultation with the client to start off the design process where they strive to understand the client?s goals in terms of the look that they are trying to achieve and the visceral emotions that they are trying to evoke by transforming the space to their liking. These discussions are supplemented with the knowledge that the company?s consultants possess about what is possible in the domain of landscape design and their own observations about the space that is to be built up or renovated.

These observations include the layout of the area, drainage issues, soil types, and more. Once the initial fruitful discussion concludes, the company begins a back and forth with the client during which it tweaks its initial design to match the client?s requirements and budget.

Once the initial consultation fee is paid, the landscapers in Eltham will then send over technicians to conduct a site line and level survey, take measurements and take extensive photographs to build an initial point of reference. The design process then involves the production of a set of color photos to accompany the plans so that the client knows exactly how the end product will look when the company is done working its magic. The final construction cost and design proposals are then put forth to the client who has to approve them. The company will then begin scheduling various tradesmen and suppliers to work on the site starting from a set date. The first progress payment will be due on the first day of construction and further payments are required to be made at pre-determined intervals to cover the cost of labor and materials.

The Melbourne-based company has been serving suburbs in Melbourne for over 40 years. It was established in 1981 and now uses its years of experience to help its clients achieve a wide range of themed landscape designs such as Japanese, Balinese, French provincial, and many more. The company?s past work has been featured in several House & Garden articles from reputable local publications in Melbourne. The company has several 5-star reviews on the home renovation and design professional directory Houzz and it is also a member of the Landscaping Victoria 'Master Landscapers', an association of landscaping industry professionals.

The company?s list of landscape design services includes environmental design, landscape gardening, pool landscaping, patio design, construction administration, and landscape architecture. The company can even customize its designs to match any bold and offbeat vision that the client may have for their own home or property. The company?s landscape design ideas and experience cover pool landscaping, steep, difficult blocks which require solutions for retaining, stormwater management and soil erosion, sustainable native gardens, drought-tolerant gardens, courtyard designs, large acreage landscaping, and balcony landscaping ideas as well as quarter-acre blocks.

Readers can head over its website to view the portfolio of its past work in Melbourne VIC. There are plenty of photos and project descriptions on the company?s website to give those who are new to the concept of landscape design plenty of ideas about the possibilities that the company can create using its decades-long expertise in the field. New homeowners and commercial property owners who need help understanding the science and trade of landscaping can also visit the company?s website to read several informative blog posts that tackle topics such as landscape design, landscape maintenance, gardening, hardscaping, ideal landscaping materials, and more.

The company can be contacted using an online form on its website for the quickest response to all queries. Its office can be contacted at the phone number (03) 9439 2013.
