AAA - Garage Door Repairs Brisbane Now Specializing in Automatic Gate Repairs Too

February 02, 2022

Hamilton, Queensland - February 02, 2022 -
AAA - Garage Door Repair, a garage door repairs Brisbane specialist, is a Queensland company that has established a reputation for offering quality garage door services. Part of this is due to the fact that they work on a wide variety of garage door-related products. This includes being one of the Brisbane area?s foremost automatic gate installation and repair specialists. No commercial or residential automatic gate installation or repair project is too big, too small, or too difficult for them to take on for a customer. A representative of AAA - Garage Door Repairs Brisbane, Yonny Ferisa, says, ?If you are looking to have an automatic garage door repaired in the Brisbane area, you will have some choices when it comes to getting this type of work done. The same cannot be said for getting an automatic gate repaired. Few companies employ technicians that can handle both automatic garage door work and automatic gate repairs. We are proud to be one of them.?

Ferisa went on to state that they recognized many years ago that automatic gates were becoming a very popular option for both home and business owners because of the convenience they offer when entering and leaving a property. That?s why for many years now they have had their techs extensively cross-train so they can diagnose & repair or install any type of automatic gate. He also mentioned that although automatic gates have many similarities in components to automatic garage doors, there are also aspects to their operation that are vastly different. That?s why he advises that anyone in Brisbane or the surrounding communities that needs help with an automatic gate problem, they call a repair service that specializes in automatic gates such as they do.

The company representative also talked about how they go about doing automatic gate repairs in Brisbane; something which they make sure they get done right the first time. It helps that their experienced automatic gate techs have learned how to address common problems like broken wires or stuck sensors and diagnose and resolve more complicated problems such as motor and control board issues. He says that safety comes first while they are working so after they test the power source to make sure that is supplying the power to the automatic gate system, they will then carefully diagnose any problems found within the gate system and shut

off the power supply to it before completing any repairs. Ferisa added that they will give the customer a fair and accurate estimate before starting any repair and no automatic gate repair that they do is ever considered to be complete until after the work area has been thoroughly cleaned up. They also make sure to test the automatic gate for proper operation before leaving the job site. He also advised that the best way to keep an automatic gate working properly and to avoid having expensive repairs done on it is to have their company perform regular maintenance and checkups on it.

Whether the techs at AAA - Garage Door Repairs Brisbane are repairing automatic gates or garage doors, customers often leave 5-star reviews regarding the prompt and efficient service they received from the company. Tina Reed proclaimed, ?Our roller door broke at 10 am on a Saturday. By 1 pm the same day our entire motor had been replaced (they did offer a cheaper fix to replace the gear if we wanted, but we chose a new motor). The guy that came was very friendly and did a quick, neat, and professional job. Very impressed.? Roman Stevens stated, ?Awesome service, awesome job! I couldn't have got any luckier than I did by calling AAA Garage Doors. I definitely recommend their services to anyone who is looking for professional garage door services.? In a rare sign of exceptional customer service, the owner of the company even responds to every single review that has been left on its reputable garage door and automatic gate services.
