

FL Restoration Company: Perfecting The Art Of Water Damage Restoration Services For Pompano Beach Residents

January 26, 2022

January 26, 2022 - PRESSADVANTAGE -

Pompano Beach, Florida based National Restoration Experts is shedding light on how they have perfected the art of water damage restoration. National Restoration Experts is a full-service damage restoration company that offers property damage restoration services for water damage, fire damage, mold removal, flood cleanup and storm cleanup provider catering to the needs of customers throughout Pompano Beach, Broward and Palm Beach Counties in South Florida.

National Restoration Experts have been offering their services for over a decade, and this vast experience has allowed them to develop a comprehensive method of helping Floridians who are dealing with water damage on their properties. Joe Hernandez of National Restoration Experts says, "We have dealt with water damage ourselves, and we know how stressful it can be when your home is affected. This is why we take our responsibility very seriously and have worked hard to ensure that, when you reach out to us, we are able to rapidly resolve your issue and let you resume your normal life as soon as possible."

Their first step on any job is to determine what is causing the leak or flooding. Whether this involves a dishwasher in disrepair, a broken supply line or even a sewage backup, the company starts by addressing the underlying source of the flooding or water. Once they have identified the source of the leak, they use industry-standard tools to remove all the water from the area.

Once all the water has been removed, they are able to assess the damage that has been done and take action. They will remove any and all items that cannot be restored or repaired, including plaster, drywall, ceilings, carpets, carpet padding, and perhaps even furniture. Then, they will work on drying up the area using professional-grade air movers and dehumidifiers. Depending on the severity of the water damage, the company cautions that this process might take several days. They fully clean and deodorize the area once it

has dried to prevent mold and odors from forming over time as well. Once all of this is completed to the property owners' satisfaction, National Restoration Experts will set about reconstructing. This will entail building new drywall, laying new carpets, installing new cabinetry, and refinishing hardwood floors as necessary.

Those who have needed water damage restoration in Pompano Beach FL or any of the company's other services have great things to say about National Restoration Experts. Joe M. writes in their Google review, "This is the first time we have had any water damage. National Restoration Experts came out promptly to clean and remove the damaged material. They quarantined the affected areas of the house. Vanessa was there to meet with the insurance company, she was great. Anis was our project manager, he also was great. He was extremely helpful and patient. His communication was perfect. He walked us through the removal and remodel process. He was on point with everything that was happening. I would definitely recommend National Restoration Experts."

Sandra H. says in their review, "Our Project Manager, Johnathan Lawlor, went through the process step by step. The few times we had to reach out to him, he responded right away. Kathryn Weiss helped us select the tile, vanity, tub, faucets and other finishes. I had no real idea of what finishes would go together. She has such good taste, and the designing experience, to have the end result look amazing. She even went to the trouble to send pictures of items with links to the products or the item number. The crew they sent were very enthusiastic and went above and beyond to do their job. I am more than pleased with the results and the service. I really couldn't ask for more. It looks amazing!"
