

JM Roofing Company of Pensacola Launches Storm Damage Roof Repair Division

January 29, 2022

January 29, 2022 -
Florida based JM Roofing Company of Pensacola is pleased to announce the launch of their new and improved storm damage roof repair division. Given the recent increase in storm activity in the region, the company realized their community would soon need the services of a responsive and effective repair team. As such, JM Roofing has expanded their storm damage team and associated services.

Currently, local communities are at risk of experiencing hurricanes, powerful tornadoes, thunderstorms and other highly damaging natural events. While some measures can be taken to limit the amount of damage a property or house suffers as a result, there is no guarantee that they will be able to withstand such forces completely intact. Furthermore, the roof, being directly exposed to the elements, is one of the main parts of a structure that will bear the brunt of a storm. In light of this, JM Roofing realized that the area is likely to soon see a sharp increase in homeowners who need repairs done swiftly in the wake of such events.

?The longer your contractor takes to get to your home,? the company observes, ?the more likely it is that your property will endure additional damage as a result, even after the storm has passed. A failure to act quickly and mitigate water damage can result in more expensive repairs and damage, and this may extend to

items within the home as well. Unfortunately, the reality of the matter is that a storm can overwhelm local services, leaving many homes without aid for hours or perhaps days at a time.?

JM Roofing continues, ?We decided to take a proactive approach and prepare ourselves ahead of time in order to ensure we can visit as many customers as possible when the need arises. Now, following a thunderstorm or extreme weather event, we are proud to say that our team will be able to expedite response times across Downtown, East Hill, Woodland Heights, Sanders Beach, East Pensacola, North Hill, Brent, Gouding, West Pensacola, Myrtle Grove, Warrington, Gulf Breeze and Oriole Beach."

The expanded department will begin by providing expedited storm damage roofing inspections for local homeowners. During this comprehensive storm damage roofing inspection, the team assigned to the property will quickly identify leak spots, missing shingles and broken tiles or shingles and then promptly assess the damage. As these inspections are carried out by certified roofing professionals, JM Roofing will also take the opportunity to provide emergency tarps to Pensacola homeowners who need to stop water from leaking into their home before full repairs or a roof replacement can be done.

JM Roofing Company of Pensacola assures their community that they will receive the same high standard of service they have come to expect, and the recent expansion mostly serves to ensure that the team can reach more people with fewer delays during periods of high demand (as would be the case after a heavy storm). Their storm damage services have also been streamlined to ensure minimal hassle for customers.

A customer who found the company online was delighted to discover that they are true to their reputation. In this excerpt from their 5-Star Google review, Gary H. explains, ?I spoke with Tina who was especially friendly and set me up with an appointment for Lou. I was given a day and time and Lou was here on time as scheduled. I shared my concerns with him, showed him where we had water spots in the home, and he immediately knew what was going on. He provided a detailed inspection for us and ultimately helped us through each phase of our roof replacement. From the moment he came to the door for the 1st time, I had a feeling he knew what he was doing and was clearly an expert. There was no bs with a 'salesman' trying to sell us on everything. Thank you to JM Roofing & Lou for such a job well done on our roof!?

Homeowners are encouraged to contact JM Roofing Company of Pensacola as soon as possible if their roof is damaged during a storm. The team will waste no time setting out to offer their expert assistance.
