

North Texas Plumbing Is Dallas Fort Worth's Premier Medical Gas Plumber

January 28, 2022

WATAUGA, TX - January 28, 2022 -
North Texas Plumbing is offering medical gas piping installation and maintenance services in the Dallas Fort Worth area. The company?s services are perfect for hospitals, medical offices, health care facilities, emergency rooms, veterinary offices, veterinary surgical centers, and operating rooms in the region that need piped supply of resources such as oxygen, medical air, nitrous oxide, nitrogen, carbon dioxide, medical vacuum, and more.

The company offers a specialized plumbing service that is fully licensed and insured for medical gas work. They can engineer the system for the entire facility to ensure all of the patient rooms and operating rooms are given the 24-hour supply of high-quality gases that is crucial to the life-saving procedures performed in them. They also serve an extremely vital role in providing life support to patients who are in critical condition and need to be hooked up to a particular resource continuously while their health is being monitored.

A spokesperson for the company explains the specialized nature of its services by saying, ?General

contractors are not well-equipped or trained in the science of installing and maintaining medical gas plumbing. If one studies the legally-enforced standards in place, one will soon find out that there is a world of information and specialization that is not readily available to general contractors unless they have been through a focused training regimen and proved their competence by acquiring the proper certifications. North Texas Plumbing has cleared all of those hurdles and has developed the capability required to provide exceptional services in this field. When you call us to install the piping for your medical facility, you are getting the best people in the business who have proven their mettle time and time again. So if you are a medical services provider in the Dallas Fort Worth area, give us a call today to get the complete solution to your medical plumbing needs.?

The American National Standards Institute has implemented the Professional Qualifications Standard for Medical Gas Personnel, ASSE/IAMPO/ANSI Series 6000-2021, which addresses the minimum requirements for medical gas systems installers, inspectors, verifiers, maintenance personnel, instructors, and designers. The aforementioned standards parallel the medical gas-related requirements of NFPA (The National Fire Protection Association) 99-2021, Health Care Facilities Code which establishes criteria for levels of health care services or systems based on risk to the patients, staff, or visitors in health care facilities to minimize the hazards of fire, explosion, and electricity. As the Dallas Forth Worth area?s premier medical gas plumbing providers, all of the employees at North Texas Plumbing that perform medical gas piping installation and maintenance have acquired the ASSE 6010 installer certification which is a requirement for any contractor who is involved in the installation of the medical gas piping system, piped vacuum systems, and the supporting parts for zones valves, manifolds, outlets, and alarms.

When asked to comment on the critical nature of their work, a spokesperson for the commercial plumbers in Dallas Fort Worth Texas says, ?We realize that our clients are trusting us with the lives of their patients when they ask us to work on their medical facility. Any misconfigurations or slip-ups on our part and the cost will be paid in human lives. We are fully cognizant of the weight of this responsibility and only deliver highly-precise work that is put through intense scrutiny every step of the way. Our work methodology leaves no stone unturned to make sure we do the job right the first time, every time. You won?t find a more reliable and dependable medical gas plumbing provider in the entire country and we are proud to be offering our services to the Dallas Fort Worth area.?

The company provides high availability plumbing services 24 hours a day, 7 days a week, 365 days a year which is perfect for its clients who deal with medical emergencies all the time and need a contractor who is flexible and can respond to situations at the drop of a hat. The company can be contacted at the phone number 817-371-0709.
