

J-Sim Releases New Report Examining The Evolution Of App Development Over The Decades

January 24, 2022

January 24, 2022 - PRESSADVANTAGE -

January 2022: In a new article, J-Sim examines the evolution of app development over the years. The report, published on J-Sim's website, was compiled by the company's tech specialists and innovators. The report was released amid the boom in smartphones and app development.

Over 7 billion apps are available on iOS and Android, which is more than the entire world population. Today, every business and organization strives to develop its mobile app to extend its digital footprint. Apps are already available for most large businesses, and small businesses are rapidly catching up. These apps went through several phases of evolution. The publication analyzes how app development has evolved over the years. The experts in the report explored how app development started.

According to J-Sim, the company's experts compiled the guide after thorough market research. The purpose of the publication was to inform and educate readers on the app journey from the beginning. The article described all phases of the evolution of app development to give a clear understanding of all the changes software technology went through to get to the current day and age. The report uncovered seven significant changes app development has experienced over the years. The report compared the history of each phase

with the current technology. The full report can be found here.

Since its inception technology guide, J-Sim has provided information, advice, research, reviews, comparisons, and analyses for helping companies and individuals in innovating by providing them with the technological skills and knowledge needed for success. The report was published as part of their regular research on technology and app development for their readers. The site also covers topics on computer technologies that can help businesses. Readers can find their laptop reviews by visiting their page: <https://www.j-sim.org/13-best-laptops-for-programming-in-2021/>.

"This report explores the history and evolution of the app world we live in today. Our lives have become so interconnected with apps, it's easy to forget how things were before and where it all began," said Editor in Chief of J-sim's website, Michael Morales. He believes in providing comprehensive tech knowledge to keep readers well informed and up-to-date on essential technologies.

As part of its efforts to assist individuals, entrepreneurs, and businesses in navigating their way through the tech world, J-Sim offers recommendations and advice on computer technology, internet security, telecoms, and the world wide web. It also discusses different tech companies, news, reviews, and industry insights.

Morales said, "These days, we simply can't move forward without solid tech knowledge. Our team of experts are dedicated to creating the best guides and authentic resources so businesses and individuals can advance in the IT world."
