

Beverly Hills Chiropractor Near Me Earns Highly Positive Reviews

February 14, 2022

Beverly Hills, California - February 14, 2022 -
Jochen Chiropractic and Wellness Center, which offers their services for those who are looking for a Beverly Hills chiropractor near me, is happy to announce that they have received yet another highly positive review from one of their clients. The chiropractic practice currently has an overall rating of 4.6 stars on Google. They have a team of chiropractors who are focused on taking a holistic approach to improving their patients? health and wellness. The chiropractic adjustments that they perform are done through the application of pressure to a number of key points along the spine, which then help to restore the normal shape and flexibility of the spine. The result is the enhancement of the functioning of the whole body.

In the five star review, Gabriella S. said, ?Dr. Jochen and his team are the best. I was referred to them for my back pain, and had never been to the chiro, so thought, ?why not!? I ended up having muscular scoliosis, and had no idea. Dr. Jochen and his team made me feel better after the first visit. I see them about 3 times a week now, and it's always the highlight of my week. Everyone is friendly, and genuinely cares to see you pain free. I would give them 12 stars if I could.?

Dr. Stephen Jochen, D.C. from Jochen Chiropractic & Wellness Center says, ?We would like to express our gratitude to our patients who have taken the time to indicate their satisfaction with our services. That has always been our aim and rest assured that we will continue to do so.?

Meanwhile, when looking for an auto injury chiropractor Beverly Hills residents may also depend on Jochen Chiropractic & Wellness Center. Victims of car crashes or auto accidents often suffer from micro-tears in the muscles and ligaments, which are the cause of the considerable pain that they feel after the accident. The problem is that x-rays often don?t reveal the presence of these micro-tears. The auto injury chiropractor will perform spinal manipulations to achieve spinal cord realignment. These manipulations will also result into the release of anti-inflammatory agents that reduce pain and inflammation throughout the patient?s body.

The manipulations will significantly improve how accident victims are feeling and will also allow them to move more easily. Spinal adjustments may also help in mobilizing the spine resulting in an improvement in mobility and the stimulation of the body?s natural healing ability to help get rid of the soreness and stiffness that occur after an auto injury.

Chiropractic care may also help in reducing scar tissue. Scar tissues form along the muscles after injuries caused by a car accident, or even a sports injury that also caused very strong forces to be applied to the muscles. This tissue damage is what makes the accident victim feel stiff and uncomfortable. Chiropractors can focus on the damaged spaces and help in breaking apart the scar tissue more quickly than if the body is just allowed to heal itself without any assistance. The result is that the patient will feel much better and get healed much more quickly than if no treatment was provided.

Thus, an auto injury chiropractor may help in alleviating pain, neck issues, stiffness, whiplash, and other discomfort that an accident victim may be suffering from. They also offer their services to people who are not victims of an auto accident but are also suffering from neck pain and back pain. To alleviate pain, they will combine several treatments, including chiropractic adjustments for optimal spinal alignment; physical therapy; and soft tissue massage therapy. For patients requiring correction and recovery, they will provide patients with the appropriate tools that target the root cause of the pain.

When in need of an auto injury or sports therapy chiropractor Beverly Hills residents can visit the Jochen Chiropractic & Wellness Center website, or contact them through the telephone or via email. They are open from 8:00 am to 7:00 pm, from Monday to Friday, and from 9:00 am to 1:00 pm on Saturdays.
