Whether Emergency or Planned Mobile Tyre Fitting, Olympus Mobile Tyre Fitting Is Ready to Provide the Service

February 16, 2022

February 16, 2022 -
Olympus Mobile Tyre Fitting, a company based in Hertfordshire, UK, is happy to announce that they are ready to offer their services in London, Hertfordshire or Essex, whether the client is in an emergency or wants a planned fitting. What this means is that car owners need not have to wait in a car dealer?s waiting room, at home, or on the road. Their mobile tyre fitting service is a quick and convenient way to have their tyres repaired or changed wherever the car is. Mobile tyre fitters will go directly to the location of the vehicle and provide the necessary remedy, saving the client both time and money.

?Our skilled mobile fitter will come to you, no matter where you are,? says Antonio Preka, owner and founder of Olympus Mobile Tyre Fitting. ?There will be no garage visits. There?ll be no need to cancel your plans. There?ll be no need to wait. We?ll fit your new tyres anywhere there is enough room for us to work, whether it?s at home, at work, or on the road. We also provide 2-hour and 4-hour tyre fitting windows, allowing you to get back to the things you enjoy without having to wait. Do you want us to come in during your lunch break? We will be there. Got a workout session that you don?t want to miss? We?ll get it done. Have a puncture on your car?s tyres? We can replace the vehicle?s tyres as well as provide mobile tyre replacement service at any time.?

When someone has a punctured tyre, the technicians from Olympus Mobile Tyre Fitting can go directly to wherever the car is located and repair the tyre as long as it is repairable. After fixing the tyre they will check to make sure that it is in compliance with British standards. However, in the event that the old tyre is no longer repairable, they will inquire about the size of the tyre before they go to the location of the car. They can offer emergency tyre fitting for those who have a flat tyre or have suffered a tyre blowout on the road. They can usually get to the affected car in 60 to 90 minutes for those in a location within Hertfordshire, Essex, or London.

Olympus Mobile Tyre Fitting can also provide roadside help for those who are unable to remove a wheel locking nut. They can provide this service 24 hours a day, from Monday to Sunday. They can remove locking wheel nuts in a safe way, without damaging or scuffing the wheels, alloys, or tyres for all vehicle brands. The tools they utilise apply a grip on the damaged or locked locking wheel nut and this enables them to remove any locking wheel bolts, rounded off lug nut, or wheel nuts, without causing any harm to the wheels or other parts. In the event that the original lock has been lost or is no longer usable, they will apply a tool for breaking the lock?s head, which will permanently destroy the wheel nut but removes it, allowing for its replacement with a new one. They will be utilising the spare tyre and jack on the boot compartment of the vehicle with the locking wheel nut tool. A locking wheel nut remover will be needed for a flat tyre to be removed, repaired, and serviced. The professionals from Olympus can also provide help when the car owner is unable to locate the lock or has damaged the locking wheel nuts.

Olympus Mobile Tyre Fitting is owned by professional tyre fitter Antonio Preka, who has been offering mobile tyre fitting services for 10 years. He had earned Level 2 diplomas in specialist tyre fitting competence, vehicle specialist tyre fitting principles, and vehicle fitting principles. He also has a Level 2 extended certificate in vehicle technology. Olympus Mobile Tyre Fitting can offer different types of tyre services, such as: tyre fitting & removal, practical tyre servicing, tubeless tyre fitting & removal, wheel security, tyre service management, and commercial vehicle technology, health & safety in the commercial tyre environment.

Those who would like to know more about the mobile tyre service provided by Olympus Mobile Tyre Fitting can visit their website, or contact them through the phone or via email.
