Irvine, California - February 14, 2022 - PRESSADVANTAGE -

Los Angeles: Bliss Drive presents a new report that explores the blend of digital and traditional marketing strategies for improved results. The report was compiled by the company's SEO specialists and digital marketing experts and published on Bliss Drive's website to discuss the effectiveness of a blended marketing strategy. The full report can be found [here](#).

To increase conversions and customer acquisition, digital marketing has largely eclipsed traditional marketing methods. However, traditional marketing still has value as not everyone spends time online. Combining the two marketing methods enables a business to reach a broader audience. Despite traditional and digital marketing debates, strategic marketers emphasize that it's not always about old vs. new marketing. This publication aims to analyze the blended approach in digital marketing for better results.

According to Bliss Drive, the report was produced after in-depth research by their experts. The report's primary focus is how traditional and digital marketing work together. The new article further sheds light on how the two forms of marketing work independently. The experts in the report also answered some common

queries on traditional and digital marketing. The report was published as part of their regular research on digital marketing strategies. Readers interested in learning more about digital marketing can visit their page: <https://www.blissdrive.com/santa-clarita-seo/>.
