

## **Rochester SEO Pulls Back The Curtain On Their New Website**

*November 06, 2015*

November 06, 2015 - PRESSADVANTAGE -

Rochester, NY based search engine optimization brand, Rochester SEO, has launched a brand new website. The company can now be found online at <http://www.rochesterseo.co>, where businesses can learn more about the variety of services offered, contact the company by phone or e-mail, and watch a unique video outlining the advantages of SEO. The site also provides clients with pertinent information regarding contracts and guarantees, they write: "Our contracts are "Worry-Free." We don't lock you into a long term contract, we deliver results and our clients stay with us because they want to, not because they have to. If you are paying for results and they are not being delivered, you shouldn't be forced to stay around."

Services offered through the website include search engine optimization, branding management, internet marketing, and website design. The company involves themselves in these processes through a variety of skill-sets and tactics like maximizing ROI, sending monthly ranking reports, partnering in terms of communication and advice, and keeping up to date with the constant changes in the online search engine industry.

In the past marketing tools like SEO weren't absolutely necessary, but the growth of the search engine

market in the past decade has created a huge calling for successful ranking online. Rochester SEO has stated that this is where they come in, to empower and arm their clients with the information and digital tools necessary to top competition and rank higher than others in their field of business. Rochester SEO writes: "We place your company in front of your best customers when they are searching for answers to help solve their problems. We can use your website, business videos and your company listings to dominate the first page of the results and your competition."

The company invites those who are interested in SEO, or those who currently use their services to follow them online through the Rochester SEO Facebook Page. This social media site allows the company to share updates on services and costs, new promotions, and report on changes in the algorithms used by Google and other search engines across the net. This is also a place where new and potential clients can interact with Rochester SEO and see what other businesses have had to say regarding their experience with the company.
