Great Lakes Building Concepts & Roofing Company Announces Expansion of Asphalt Shingle Crews

March 02, 2022

March 02, 2022 -
Grand Rapids roofing company Great Lakes Building Concepts & Roofing Company has announced an expansion of its asphalt shingle roofing crews.

Asphalt shingles are the most popular residential roofing solution and for good reason. They are extremely durable and come in at a price range that makes them affordable for most new residential construction projects as well as roof renovation projects where the home is being upgraded. Roofers also love them because they are easy to install leading to lower turnaround times for even large projects, saving the homeowners both time and money. They are also excellent at resisting the harsh weather that an upper midwestern state like Michigan receives regularly. Asphalt shingles are fiercely resistant against strong winds, snow, and hail, the typical assortment of nature?s offerings during the winter storm season.

It is no wonder, then, that asphalt shingles are as popular as they are and the demand for asphalt shingle roofing expertise spikes during the spring season, which offers one of the best windows in the year to repair and mend the damage that the preceding winter months have wreaked on roofs throughout the state while giving enough time to prepare for the storms that the spring season has in store. Great Lakes Building

Concepts & Roofing Company has recognized this incoming surge of roofing contracts and is bolstering its asphalt shingle roofing crews to be better prepared for the rise in customer inquiries.

The spokesperson for the company, Jason Clark, talks about the recent expansion by saying, ?Heading into the spring season, Great Lakes Building Concepts & Roofing Company of Grand Rapids is expanding our asphalt shingle roofing crews. With asphalt shingles being the primary roofing material found on Grand Rapids, Michigan, residential & multi-family homes, we want to increase our capacity to help more homeowners across the Grand Rapids metropolitan area. Increasing the asphalt shingle division will allow us to give our valued customers quicker response times for both asphalt shingle roof repair and asphalt shingle roof replacement estimates. A larger team of sales reps, technicians, and crews will allow us to offer expedited quotes, repairs, and replacements. With an active spring storm likely, Great Lakes Building Concepts will already be prepared for an influx of calls and new customer requests by having a larger staff and team waiting to properly serve Grand Rapids homeowners. This has been an ongoing process and the asphalt shingles roofing crew will continue to be revamped to be prepared for the spring season.?

Great Lakes Building Concepts & Roofing Company is regarded by many to be the best Grand Rapids roofing contractor due to its wide range of residential and commercial roofing services that encompass everything from roofing, windows, siding, and gutter repair, replacement, and installation. The company also offers emergency roofing services for customers who are dealing with unexpected repairs such as a partial or complete roof collapse. The company?s roofing services for businesses incorporate working with a wide range of roofing materials such as metal, slate, tile, cedar shake, EPDM Rubber, PVC, and more, ensuring they always have the expertise to solve the roofing problems experienced by almost any kind of property. The business is also rated at an A+ from the Better Business Bureau.

Great Lakes Building Concepts & Roofing Company also serves other towns near Grand Rapids such as Wyoming, Kentwood, Muskegon, Jenison, Hudsonville, Allendale, Byron, Comstock Park, Cutlerville, Holland, Norton Shores, East Grand Rapids, and Walker. The company also offers a simple financing solution for homeowners who want to get crucial roofing repairs done but can?t afford to pay the entire cost at once. Homeowners can sign up for financing for as low as $97 per month to ensure their home is in the best possible condition to weather the expected spring storms.
