

Be Safe Publishes Expert-Led Article To Provide Guidelines For Improving Home Security

February 22, 2022

February 22, 2022 - PRESSADVANTAGE -

February 2022: Be Safe releases a new article that discusses guidelines for improving home security. The report, published on Be Safe's website, was compiled using expert opinions on the topic. The report was released amid the rise in burglaries in the U.S. The full report can be found [here](#).

According to the FBI, a new burglary occurs every 26 seconds in the US, with over 1 million burglaries per year. To ensure personal and property safety, appropriate security measures are paramount. However, many people find it difficult to figure out how much security is adequate. While there is no easy answer, people can work to ensure they cover all the basics to stay as safe as possible. The publication analyzes how home security can be significantly improved. The experts in the report explained the steps residents can take to boost security.

For the report, security experts were consulted for their professional views on home security. Home improvement experts were also quoted in the article. The final compilation and review of the report were overseen by Be Safe's team of security experts. The experts interviewed for this article discussed the various aspects that need to be considered for improving security measures. The reports found 14 key

security points that can make a difference in overall home security.

Since its inception, security advisor Be Safe has provided information, advice, research, reviews, comparisons, and analyses for helping individuals, communities, and the public on matters pertaining to personal, physical, and community security. The report was published as part of their regular research on home security for their readers. For more information on security systems, readers can visit their page at <https://www.be-safe.org/what-is-the-best-and-cheapest-home-security-system/>.

"This report explores all the vital aspects of home security- from securing the premises with physical security measures to personal awareness. Our report is backed by expert analysis to provide a comprehensive and authentic guide for readers," said Kory Rex, Security Consultant of Be Safe. He believes people need to be well informed on the risks and learn the best ways to safeguard themselves.

In its efforts to create security awareness among the public, Be Safe offers recommendations and advice for home safety measures and security products and services. It also discusses cybersecurity solutions and provides news from the

Rex said, "With this report, we aim to provide in-depth authentic information on topics that directly impact community safety, security, and quality of life."
