

# Metadams NFT Project On Cardano Is Ready To Launch A land Sale

*March 01, 2022*

Aventura, Florida - March 01, 2022 - PRESSADVANTAGE -

On March 5th, 2022, Metadams will be holding a land parcel sale on the Cardano blockchain. The company has announced that 4317 lands parcels will be available for purchase, with 2115 being airdropped for the holders of NFT Collection: "Prime Beavis." Whitelisted members will be able to start minting at 9 pm UTC on the 4th of March. 24h before the public sales. Whitelisted members will be able to buy up to 4 lands. Public mint is Starting on the 5th at 9pm UTC. "This is a groundbreaking event in the world of blockchain and digital real estate on Cardano blockchain," According to VItaliy.

In the play-to-stake game Metadams, players can own their own land to power their game. The more lands players own, the more power sources they can get, and the more ADA can be generated. Players can also use their lands to customize their houses and furniture.

Metadams offers a new way to play games, In this game, players will have to manage power sources, which represent staked ADAs, in order to generate rewards over time. The different types of power sources offer

different base reward rates. Players can also increase their rewards rate by doing maintenance actions on the items. This new approach gives players a gaming experience that's both fun and exciting for everyone.

Players can now stake their ADA to Metadams. This allows players who have Cardano (ADA) to delegate it via staking pool and earn a reward for doing so. The pool then distributes 100% of its rewards back into the wallet that is specified by the player, giving them instant access to withdraw from their account according to in-game earnings.

This system is designed to ensure that the rewards earned in the pool match the rewards players can withdraw in-game. Metadams takes no fees on staking, making this system possible.

Metadams does not take any income from staking. The company's goal is to strengthen the Cardano community by gamifying the staking process. Metadams has gathered some of the best partners in the Cardano ecosystem to enrich its universe and make it more fun and engaging for users. With Metadams, anyone can participate in staking and help support the network. Thanks to its partnerships, Metadams offers a variety of rewards for users who stake their ADA. Metadams partnered up with Chilled Kongs, Muesli swap, Ledgity, Liquid, Cardax, Epoch art, Smart chain, Cardanians, Rats dao, Ardano.

The communication manager of Metadams, Benjamin has announced that the company is set to release its Multiplayer Mode in March 2022. In an interview with JCrypto Youtuber and Cardano enthusiast, he explained that they are still working on some issues but otherwise everything should be ready by then. He also shared his thoughts about what he would like to see from the company's future updates explained the role of the Prime Beaviz NFT collection.

In order to use the Play-To-Stake functionality, players are required to own their land in Metadams. This will let both enter and earn in the game. Land ownership is a key part of the Metadam's experience and is necessary for players to participate in the game's economy.

Prime Beaviz are Alpha Passes, which will give exclusive access to Metadam's Alpha and future in-game advantages. This upgrade gives players a chance to enjoy the game from an earlier stage of development and also get some perks such as special items or currencies.
