

ROI Construction Receives 5 Star Review For A Successful TPO Flat Roofing Contract

March 15, 2022

Savage, Maryland - March 15, 2022 -
ROI Construction, one of the premier commercial roofing contractors serving Maryland and Washington DC, has received a 5-star review for the work it recently did for a client. The company helped replace the client?s TPO roof and the client commended the company on a job well done and the professionalism that the contractors displayed while working on their site.

The review says, ?From start to finish, ROI was great to work with! They respond immediately to my request for an estimate and I had numbers in hand within 24 hours. Then, even though I had to delay the start of the project, they stuck to the quoted price and got the work done exactly when they said it would be done! Their crew of roofers worked REALLY hard and did a fantastic job. I would especially commend Edgar and Cody, the two gentlemen I dealt with personally, as being super friendly and professional. I will definitely be using this company again!!?

The owner and operator of ROI Construction, Dominic Dipietro, responded to the testimonial by saying,

?Thanks, Rocky! We are glad we could give you a replacement TPO roof that we all can be proud of. Your home looks beautiful with the new TPO roof. It's going to be protected for years to come. Happy to hear about your experience with our crew members, we hope to help out however we can in the future!?

The aforementioned 5-star review is yet another feather in the cap for ROI Construction which is almost about to breach a critical milestone of 150 5-star reviews on its Google My Business page. Some of the company?s most recent 5-star reviews, along with the owner?s thoughts on what makes his company so successful, were highlighted in a press release that can be read at https://www.pressadvantage.com/story/50509-roi-construction-on-the-verge-of-breaking-elusive-threshold-of-150-5-star-reviews.

When asked about the benefits and challenges of TPO/Flat roofing, Dominic says, ?TPO is a great material for roofing because it is both durable and versatile. It can be used in both commercial and residential buildings. It is also available in a variety of thicknesses, widths, shapes, and colors. A TPO roof can last for up to 30 years. This is a fact. However, like all truths in life, there is a small unsaid caveat. You are only going to get those full 30 years of life from your TPO roof if you rely on the services of an experienced contractor who knows what they are doing. There are many ways a shoddily installed, replaced, or repaired TPO roof can fail. Case in point, a TPO roof can be punctured by debris, pests, or even a ripping seam. It can also develop failed flashing, leading to leaks inside the house. When a TPO roof has a failure, water can leak through the roof, damaging the interior or exterior. This water will eventually seep into the roof itself. There are many ways for things to go disastrously wrong and, therefore, it is of prime importance for you to do your due diligence when it comes to hiring a TPO roofer if you want your new TPO roof to be a success. When selecting a TPO roofer, be sure to check the company's credentials before hiring them. A reputable TPO roofer will be familiar with various types of materials and will also be able to ensure that all necessary precautions have been taken before the job is finished. A professional TPO roofer will also use TPO roofing sheets that are 6-12 feet wide and will heat weld them to ensure that the seams are sealed properly. We are familiar with all these standard industry practices because we use TPO roofing extensively on many projects regularly. So if you are looking for the best of the best when it comes to TPO or flat roofing in Maryland and Washington DC, make sure to give ROI Construction a call.?
